Total Water Contamination Events	213	Total Days	1147
----------------------------------	-----	------------	------

Chronic events not included in total contamination events figure above 5

Chronic days not included in total days figure above 503

Note:

Chronic days and events are not tallied with other events because normal protocols to remove signs are not followed at these locations. Although sample results at chronic locations may be within State Standards, the presence of known, on-going sources of contamination require signs to remain posted at these locations to protect public health.
