Calendar year summary

<u>Event tally</u>							<u>Duration (days)</u>			
Closures (sewage)			36				Closure days			203
Advisories			94				Advisory days			780
exceedances		89								
complaints		0								
excavation/ flushing of outlet		5								
reclaimed water spill		0								
precautionary		0								
General Advisories			9				General Advisory days			47

chronic events 3 chronic advisory and closure days 542

Note:

Chronic days and events are not tallied with other events because normal protocols to remove signs are not followed at these locations. Although sample results at chronic locations may occasionally be within state standards, the presence of known, on-going sources of contamination require these beaches to remain posted under an advisory or closure to protect public health.

For accurate comparisons of yearly beach closure and advisory data, see the *San Diego County 2005 Beach Closure and Advisory Report*. This report uses the Beach Mile Day unit to compare closures on a year to year basis, and advisories due to bacterial exceedances during the AB411 period (April - October).
