303(d) LIST PREPARATION

Regional Water Quality Control Boards are, or will soon be, requesting information that may assist in the development of lists of impaired water bodies as required by section 303(d) of the Clean Water Act. The Department of Pesticide Regulation (DPR) would like to notify you of data that may be useful in developing the lists.

DPR's surface water database contains reports of sampling of surface waters for pesticides. It includes studies conducted by both DPR and other entities in the public and private sectors. A CD ROM containing the database was sent to each regional board. Updated information is available on DPR's Web site at <<http://www.cdpr.ca.gov/docs/surfwatr/surfddata.htm>>. The Web site also provides a contact for further information.

In addition, DPR has conducted and reported on a number of studies that may be of interest to you. Reports have been provided to appropriate regional boards and can also be found on DPR's Web site. These include:
