

COMMENT LETTER 39 - JOI LOSEE (NO DATE), RECEIVED SEPTEMBER 24, 1996

Response to Comment 39-1

Comment Summary: The comment expresses opposition to a project proposing aquifer storage and recovery (ASR).

Aquifer Storage and Recover (ASR) is no longer part of the Subregional Long-Term Wastewater Project. A separate ASR project was considered by the City, but all work on ASR was halted pending selection of a Long-Term Project alternative. Depending on the selected alternative, additional storage for reclaimed water may or may not be needed. ASR would be subject to separate environmental review if the City decided that it should be considered as a potential future project.
