

**COMMENT LETTER 61 - CHRISTINE PHILPITT (SEPTEMBER 25, 1996),
RECEIVED SEPTEMBER 30, 1996**

Response to Comment 61-1

Comment Summary: The comment calls for a boycott of the City of Santa Rosa if the Subregional System project goes forward.

As described on page 1-1 of the Draft EIR/EIS, “The North Coast Regional Water Quality Control Board requires that, by 1999, the Santa Rosa Subregional Wastewater Reclamation System (Subregional System) must put in place a reclaimed water disposal solution that meets the Board’s reliability requirements and existing and future capacity needs, no matter what weather conditions occur.” The City is thus required to implement a project.
