

**COMMENT LETTER 66 - LOU ANN JOHNSON (SEPTEMBER 30, 1996),
RECEIVED OCTOBER 1, 1996**

Response to Comment 66-1

Comment Summary: The comment refers to the population growth that has occurred in Santa Rosa since 1989 and opines that there will be even more sewage problems in the future if the growth is not addressed now.

One of the overall objectives of the Project is to “Provide wastewater treatment and disposal for the Santa Rosa Subregional Wastewater System to accommodate projected growth as indicated in the currently adopted General Plans of each of the Subregional entities.” Growth in the project area is controlled by those General Plans, not by the Subregional System, and the impacts of that growth are addressed in the environmental documentation prepared for each General Plan and its revisions.
