

Santa Rosa Subregional Long-Term Wastewater Project

## DRAFT EIR/EIS COMMENT FORM

DUE OCTOBER 7, 1996 4:30 PM

Name:

R. L. Jales

Date:

Oct 3, 1996

Address:

1875 Mountain View Ave

CITY OF SANTA ROSA

P.O. Box 1678

Santa Rosa, CA 95402

City:

Petaluma

State:

Calif

Zip:

94952

Phone:

(707) 762-8749

OCT 07 1996

DEPARTMENT OF  
COMMUNITY DEVELOPMENT**How to use:**

Please fill out the above and provide your written comments about the Draft EIR/EIS in the space provided below. You may add additional pages if needed. Please write legibly. If you prefer to type your comments on a separate page, please attach to this form. Where possible, please reference the page to which the comment refers. When you have completed your comments, please fold the form so the City's address is showing, tape the edges together, (Do not use staples), and place in the mail.

To whom it may concern. I do not care to refer to any individual or specific assertion as offered by the Wastewater EIR/EIS draft, instead I wish to voice a concern that I've felt for some time. Let me explain - Certain Facts.

1. Santa Rosa wishes to become a major city.
2. Therefore with a larger city comes a larger population.
3. & in turn more wastes - Residential - industrial etc.
4. The Russian River (now destroyed) can not handle any - or much more waste - What's the answer?
5. Look for more ocean orientated water courses to dump into then its all down hill to the Pacific O.
6. But wait - the public (if they knew) would not buy it. A thought - tell the few farmers (South County) that they can irrigate with it. Great idea.
7. But how much water can crops handle before they rot.

Answer: Ask the San Joaquin Boys (Salts) or Imperial Valley Westerson anyone?

001

Pg 1 of 2

8 So what do you do with a surplus of waste water due to population increase and irrigation can't handle it - your right, you "Dump it"

9 Is that why the distribution & transmission lines are located AND terminate at the head of well defined water courses - (Fig 4.41C)

See Below -

10	Blutcher Creek	Estero Americano
	Stemple Creek	} Estero de San Antonio
	Seavey Creek	
	Laguna Lake (Purvine Rd)	Walker Creek
	Little Laguna	San Antonio Creek
		Petaluma Creek (River)

Finis

In my estimation the public is being sold a bill of goods, and were they to be aware of the forthcoming pollution of the above-mentioned streams, along with the increasing of polluting portions of San Francisco Bay - both Bolinas and Tomales Bays as well as contributing to further pollution of the Pacific Ocean, Look out !!
