**DEPARTMENT OF  
COMMUNITY DEVELOPMENT**

**How to use:**

Please fill out the above and provide your written comments about the Draft EIR/EIS in the space provided below. You may add additional pages if needed. Please write legibly. If you prefer to type your comments on a separate page, please attach to this form. Where possible, please reference the page to which the comment refers. When you have completed your comments, please fold the form so the City's address is showing, tape the edges together, (Do not use staples), and place in the mail.

I urge you to look deeper into the Geysers Recharge option. I understand from colleagues at Unocal that there significant errors for the pipeline costs and annual power costs in the way the Geysers option costs have been calculated. There are also opportunities to pursue state & federal funding for projects which promote renewable energy sources such as the Geysers. 001

I also understand from colleagues that a "combined" solution, where some river discharge and irrigation can be conveniently combined with the Geysers project, is even more attractive. 002

What an opportunity to both safely dispose of sewage and enhance one of the world's great 003
