Dear City Council Members -

We the undersigned registered voters and home owners living in Monte Rio and Guerneville are totally opposed to the proposed 2050 River discharge of Santa Rosa Sewage. We regard any discharge of Santa Rosa Sewage, however, well treated as toxic waste and a health hazard to our community. This destroys property value and has led to the belief that swimming in our river is dangerous. We believe the Sewage should be given or sold to farmers as a reduced rate for irrigation. No matter how "well treated" we don't want even 1% of Santa Rosa Sewage. Open discharge is the only option we support.
