DEPARTMENT OF COMMUNITY DEVELOPMENT  
Post Office Box 2184, Guerneville, California, 95446

Dear City Council Members,

001

We are home owners and registered voters living in Mendocino and working in San Francisco. We are totally opposed to the proposed 20" river discharge. We are health workers, and as health workers regard and believe any discharge of Santa Rosa Sewage, however well treated, as toxic waste and a health hazard to our community which flows through our town. This destroys property values and has led to our belief that swimming in our river is dangerous. We believe that the treated sewage should be given or sold to farmers at a reduced rate for irrigation. If your sewage is so well treated, then rather than seeking to dump it away, use it yourselves! The smaller what, we don't want Santa Rosa Sewage, not even 1" is dumped. Your discharge is the only option we suggest. Thank you. Christmas Leubrie  
Alice Heimsoth

004

~~P.S. Due to our work schedules and the long commute, we are unfortunately unable to be physically present. However we most strongly protest your proposal to make routine the disastrous discharge that was considered an "accident" that destroyed our tourist base in 1985. May we remind you that we are registered voters and vote in every election.~~

Alia Hearnsoth  
& Christina Leukie RN

P.S. We took the day off from our jobs in order to attend this hearing. We are that adamant in our opposition to your proposal.
