Sirs:

001

I have reviewed the EIR-EIS for
wastewater disposal and am convinced
that it is already far too complete.
Further effort only increases waste
of taxpayers money.

We home owners and ratepayers
already pay far more for waste water
treatment than should be necessary.
Added charges will further reduce the
value of our homes and damage the
economy in Sonoma County.

002

It is essential that we proceed
with the low cost alternative with
minimum additional studies.
