CITY OF SANTA ROSA

P.O. Box 1078
Santa Rosa, CA 95402

SEP 24 1996

DEPARTMENT OF
COMMUNITY DEVELOPMENT**How to use:**

Please fill out the above and provide your written comments about the Draft EIR/EIS in the space provided below. You may add additional pages if needed. Please write legibly. If you prefer to type your comments on a separate page, please attach to this form. Where possible, please reference the page to which the comment refers. When you have completed your comments, please fold the form so the City's address is showing, tape the edges together, (Do not use staples), and place in the mail.

- 1) Impact of Fertilization - Phosphates + Nitrogen 001
 ⇒ Greater Algae bloom, Turbidity + Exacerbated Eutrophication - The river has begun to recover from a downward ecological trend created by Man influence! As a result of Warm Springs Dam - increase the Flow has help Already the Anadromous Fishes (Steelhead - Salmon) are endangered - Letra Minor - River Otter has made a come back.
 * Are we willing to risk this sensitive Recovery Process!

- 2) Tourism is the mainstay of Lower River Economy 002
 More + more Local - Santa Rosans are using the river for Recreation + Swimming - With 20% Greater Effluent would you swim in the River?
 I think the EIR did not treat these matters Justly!
