SUBJECT: WASTE WATER TO THE WEST COUNTY

9. THE ADVERSE AFFECT ON THE TOWN OF Bloomfield IF A DAM BROKE AS STATED IN S.R. DEIR/EIS Page 4, 19-5, 6.

I would also like you to be aware of the fact that presently, during periods of heavy rain, Valley Ford Road, Lower Bloomfield Road and parts of downtown Bloomfield flood at depths of more than one foot. 003

If more water was added for irrigation during non-rainy periods and underground stream levels rose, the flooding in downtown Bloomfield during rainy periods would be disastrous. I completely 004

disagree with any wastewater project in the West County or Bloomfield, Valley Ford areas. Open up your eyes and see the beauty of this area.
