

MEMORANDUM

CH2M HILL

TO: Ivy Edmonds, Engineering Science
COPIES: Dan Carlson, City of Santa Rosa
FROM: Carol Abramson, SRS
DATE: December 7, 1995
SUBJECT: Laguna Facility Air Emissions Modeling Results for the Long-Term Project EIR
PROJECT: 102767.H7.LT

Attached is the technical memorandum, ISCST3 Modeling Results for Laguna POTW Aeration Basins, which provides the results of the air emissions modeling needed for the Long-term Project EIR. In summary, the results show that the cancer risk of perchloroethylene from the aeration basins is below the 1 in a million trigger level at the property boundaries with residences.
