Triggering Water Quality Objective for Listing

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for e. coli is 126 MPN/100mL for the Basin Plan REC1 Freshwater 30-Day Minimum 5 samples objective. In Dominguez Channel (above Vermont), the criterion was exceeded in 26 of 36 samples, which is 72.2% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for e. coli if there are 6 or more exceedances out of the 36 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.

Triggering Water Quality Objective for Delisting

The California Toxics Rule contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for dissolved zinc is 50 µg/L for the CTR Aquatic Life Freshwater Acute (CMC) objective. In Dominguez Channel (above Vermont), the criterion was exceeded in 6 of 73 samples, which is 8.2% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for dissolved zinc if there are 6 or fewer exceedances out of the 73 samples.

Applicable Water Quality Objectives	Out of 108 Samples:	# Exceed	% Exceed	List	Delist
128 µg/g		N/A	N/A	Yes	No

Triggering Water Quality Objective for Listing

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total lead is 128 µg/g for the objective. In Dominguez Channel (Estuary to Vermont), the criterion was exceeded in 28 of 108 samples, which is 25.9% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for total lead if there are 10 or more exceedances out of the 108 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.

Triggering Water Quality Objective for Listing
The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for fecal coliform is 200 MPN/100mL for the Basin Plan REC1 Freshwater 30-Day Minimum 5 samples objective. In Dominguez Channel (above Vermont), the criterion was exceeded in 54 of 59 samples, which is 91.5% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for fecal coliform if there are 10 or more exceedances out of the 59 samples.

Triggering Water Quality Objective for Delisting
Not eligible for delisting.

Triggering Water Quality Objective for Listing

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for e. coli is 126 MPN/100mL for the Basin Plan REC1 Freshwater 30-Day Minimum 5 samples objective. In Dominguez Channel (Estuary to Vermont), the criterion was exceeded in 10 of 14 samples, which is 71.4% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for e. coli if there are 5 or more exceedances out of the 14 samples.

Triggering Water Quality Objective for Delisting
The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for total chromium (total) is 50 µg/L for the Basin Plan MUN objective. In Dominguez Channel (above Vermont), the criterion was exceeded in 0 of 153 samples, which is 0% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total chromium (total) if there are 12 or fewer exceedances out of the 153 samples.

Triggering Water Quality Objective for Listing

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for total aluminum is 1000 µg/L for the Basin Plan MUN objective. In Dominguez Channel (above Vermont), the criterion was exceeded in 6 of 46 samples, which is 13% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for total aluminum if there are 4 or more exceedances out of the 46 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.

Triggering Water Quality Objective for Delisting

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total copper is 270 µg/g for the objective. In Long Beach Harbor Main Channel, SE, W Basin, Pier J, Breakwater, the criterion was exceeded in 5 of 266 samples, which is 1.9% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total copper if there are 22 or fewer exceedances out of the 266 samples.

No objectives were exceeded.

Triggering Water Quality Objective for Delisting

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total copper is 270 µg/g for the objective. In Los Angeles Harbor Main Channel, the criterion was exceeded in 3 of 57 samples, which is 5.3% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total copper if there are 4 or fewer exceedances out of the 57 samples.

No objectives were exceeded.

Triggering Water Quality Objective for Delisting

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total copper is 270 µg/g for the objective. In Los Angeles Harbor E , W Basin, Slip No 1, Slip No 5, Turning Basin, Cerritos Channel, the criterion was exceeded in 4 of 280 samples, which is 1.4% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total copper if there are 23 or fewer exceedances out of the 280 samples.

Triggering Water Quality Objective for Listing

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total copper is 270 µg/g for the objective. In Los Angeles Harbor Southwest Slip, the criterion was exceeded in 6 of 24 samples, which is 25% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for total copper if there are 2 or more exceedances out of the 24 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.

Long Beach Harbor Main Channel, SE, W Basin, Pier J, Breakwater
Total Zinc - Sediment

Table 1. Data Summary Information

Waterbody Name	Long Beach Harbor Main Channel, SE, W Basin, Pier J, Breakwater	Region	4
		Total Waterbody Size	1076 Acres
Hydrologic Unit	405.12	Size Affected	1076 Acres
Pollutant/Stressor	Zinc	Extent of Impairment	Entire Reach

Table 2. Summary of Zinc for Long Beach Harbor Main Channel, SE, W Basin, Pier J, Breakwater

Dates of Sampling	8/18/1992 - 10/5/1998	Minimum Detected Value	0.774 µg/g
Number of Samples	263	Maximum Detected Value	4170 µg/g
Number of Detected Samples	263	Median Detected Value	80 µg/g
Hardness			N/A
pH			N/A
WER			N/A
Temperature			N/A

Beneficial Uses for Long Beach Harbor Main Channel, SE, W Basin, Pier J, Breakwater

Applicable Water Quality Objectives	Out of 263 Samples:	# Exceed	% Exceed	List	Delist
410 µg/g		N/A	N/A	No	Yes

Triggering Water Quality Objective for Listing

No objectives were exceeded.

Triggering Water Quality Objective for Delisting

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total zinc is 410 µg/g for the objective. In Long Beach Harbor Main Channel, SE, W Basin, Pier J, Breakwater, the criterion was exceeded in 7 of 263 samples, which is 2.7% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total zinc if there are 22 or fewer exceedances out of the 263 samples.

Long Beach Harbor Cerritos Channel, E Basin, Inner Harbor
Total Zinc - Sediment

Table 1. Data Summary Information

Waterbody Name	Long Beach Harbor Cerritos Channel, E Basin, Inner Harbor	**Region**	4
		Total Waterbody Size	Not available
Hydrologic Unit	405.12	**Size Affected**	Not available
Pollutant/Stressor	Zinc	**Extent of Impairment**	Entire Reach

Table 2. Summary of Zinc for Long Beach Harbor Cerritos Channel, E Basin, Inner Harbor

Dates of Sampling	11/3/1987 - 10/13/1999	Minimum Detected Value	2.39 µg/g
Number of Samples	57	Maximum Detected Value	870 µg/g
Number of Detected Samples	57	Median Detected Value	200 µg/g
Hardness			N/A
pH			N/A
WER			N/A
Temperature			N/A

Applicable Water Quality Objectives	Out of 57 Samples:	# Exceed	% Exceed	List	Delist
410 µg/g		N/A	N/A	Yes	No

Triggering Water Quality Objective for Listing

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total zinc is 410 µg/g for the objective. In Long Beach Harbor Cerritos Channel, E Basin, Inner Harbor, the criterion was exceeded in 10 of 57 samples, which is 17.5% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for total zinc if there are 5 or more exceedances out of the 57 samples.

Triggering Water Quality Objective for Delisting

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total zinc is 410 µg/g for the objective. In Los Angeles Harbor E , W Basin, Slip No 1, Slip No 5, Turning Basin, Cerritos Channel, the criterion was exceeded in 10 of 315 samples, which is 3.2% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total zinc if there are 26 or fewer exceedances out of the 315 samples.

Triggering Water Quality Objective for Listing
No objectives were exceeded.

Triggering Water Quality Objective for Delisting
The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total zinc is 410 µg/g for the objective. In Los Angeles Harbor Main Channel, the criterion was exceeded in 1 of 59 samples, which is 1.7% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total zinc if there are 4 or fewer exceedances out of the 59 samples.

Los Angeles Harbor Southwest Slip
Total Zinc - Sediment

Table 1. Data Summary Information

Waterbody Name	Los Angeles Harbor Southwest Slip	Region	4
		Total Waterbody Size	63 Acres
Hydrologic Unit	405.12	Size Affected	63 Acres
Pollutant/Stressor	Zinc	Extent of Impairment	Entire Reach

Table 2. Summary of Zinc for Los Angeles Harbor Southwest Slip

Dates of Sampling	4/30/1993 - 4/14/1997		Minimum Detected Value	100 µg/g
Number of Samples	22		Maximum Detected Value	1850 µg/g
Number of Detected Samples	22		Median Detected Value	204 µg/g
Hardness				N/A
pH				N/A
WER				N/A
Temperature				N/A

Out of 22 Samples:	# Exceed	% Exceed	List	Delist
	N/A	N/A	Yes	No

Triggering Water Quality Objective for Listing

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total zinc is 410 µg/g for the objective. In Los Angeles Harbor Southwest Slip, the criterion was exceeded in 7 of 22 samples, which is 31.8% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for total zinc if there are 2 or more exceedances out of the 22 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.

Triggering Water Quality Objective for Listing

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for enterococcus is 35 MPN/100mL for the Basin Plan REC1 Marine 30-Day Minimum 5 samples objective. In Cabrillo Beach (Inner) LA Harbor Area, the criterion was exceeded in 668 of 2963 samples, which is 22.5% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for enterococcus if there are 492 or more exceedances out of the 2963 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.

Triggering Water Quality Objective for Delisting

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The Basin Plan requires a pH range between 6.5 to 8.5. In Los Angeles River Reach 1 (Estuary to Carson Street), 2 of 54 samples were below this range, which is 3.7% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for pH if 8 or fewer of the 54 samples are below the required range.

Triggering Water Quality Objective for Delisting

The California Toxics Rule contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for dissolved zinc is 170 µg/L for the CTR Aquatic Life Freshwater Chronic (CCC) objective. In Los Angeles River Reach 1 (Estuary to Carson Street), the criterion was exceeded in 0 of 54 samples, which is 0% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for dissolved zinc if there are 4 or fewer exceedances out of the 54 samples.

Ammonia as N - Water

Table 1. Data Summary Information

Waterbody Name	Los Angeles River Reach 4 (Riverside Dr. to Sepulveda Dam)	**Region**	4
		Total Waterbody Size	11 Miles
Hydrologic Unit	405.21	**Size Affected**	11 Miles
Pollutant/Stressor	Ammonia as N	**Extent of Impairment**	Entire Reach

Table 2. Summary of Ammonia as N for Los Angeles River Reach 4 (Riverside Dr. to Sepulveda Dam)

Dates of Sampling	8/5/1997 - 2/1/2001	Minimum Detected Value	0.11 mg/L
Number of Samples	44	Maximum Detected Value	17.36 mg/L
Number of Detected Samples	44	Median Detected Value	5.04 mg/L
Hardness			N/A
pH - actual and/or default values			7.8
WER			N/A
Temperature - actual and/or default values			20 °C

Triggering Water Quality Objective for Listing

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for ammonia as n is 2.235 mg/L for the Basin Plan Freshwater Not SPWN Inland 30-Day Average objective. In Los Angeles River Reach 4 (Riverside Dr. to Sepulveda Dam), the criterion was exceeded in 27 of 44 samples, which is 61.4% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for ammonia as n if there are 4 or more exceedances out of the 44 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.

Triggering Water Quality Objective for Delisting

The California Toxics Rule contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for dissolved copper is 13 µg/L for the CTR Aquatic Life Freshwater Chronic (CCC) objective. In Los Angeles River Reach 1 (Estuary to Carson Street), the criterion was exceeded in 4 of 63 samples, which is 6.4% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for dissolved copper if there are 5 or fewer exceedances out of the 63 samples.

Triggering Water Quality Objective for Delisting

The contains water quality criteria for waterbodies in California. The most conservative applicable water quality criterion for total zinc is 410 µg/g for the objective. In Los Angeles River Estuary (Queensway Bay), the criterion was exceeded in 2 of 55 samples, which is 3.6% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total zinc if there are 4 or fewer exceedances out of the 55 samples.

Triggering Water Quality Objective for Delisting

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for total aluminum is 1000 µg/L for the Basin Plan MUN objective. In Los Angeles River Reach 1 (Estuary to Carson Street), the criterion was exceeded in 6 of 80 samples, which is 7.5% of the sample events. Under the state's listing policy, a waterbody is eligible for delisting for total aluminum if there are 6 or fewer exceedances out of the 80 samples.

Triggering Water Quality Objective for Listing
The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for fecal coliform is 200 MPN/100mL for the Basin Plan REC1 Freshwater 30-Day Minimum 5 samples objective. In Los Angeles River Reach 1 (Estuary to Carson Street), the criterion was exceeded in 41 of 43 samples, which is 95.4% of the sample events. Under the state's listing policy, a waterbody is considered to be impaired for fecal coliform if there are 8 or more exceedances out of the 43 samples.

Triggering Water Quality Objective for Delisting
Not eligible for delisting.

Triggering Water Quality Objective for Listing

The Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties, 1994 contains water quality criteria for waterbodies in the Los Angeles Region. The most conservative applicable water quality criterion for fecal coliform is 200 MPN/100mL for the Basin Plan REC1 Freshwater 30-Day Minimum 5 samples objective. In Los Angeles River Reach 4 (Riverside Dr. to Sepulveda Dam), the criterion was exceeded in 851 of 896 samples, which is 95% of the sample events. *Under the state's listing policy, a waterbody is considered to be impaired for fecal coliform if there are 149 or more* exceedances out of the 896 samples.

Triggering Water Quality Objective for Delisting

Not eligible for delisting.
