

Surface Water Ambient Monitoring Program (SWAMP) Quality Assurance Program Plan (QAPrP)

Per Section 6.1.4 of the Listing Policy, major monitoring programs in California are considered of adequate quality. The Surface Water Ambient Monitoring Program (SWAMP) meets the requirements of the Listing Policy as a major monitoring program.

This project is a SWAMP-funded project or is required to be consistent with SWAMP. SWAMP-funded projects, and projects required to be consistent with SWAMP, must follow the guidelines of the SWAMP Quality Assurance Program Plan (QAPrP). The SWAMP Quality Assurance Program Plan (QAPrP) describes SWAMP's quality system including elements such as responsibilities of management and staff; as well as quality control and sample handling guidelines for both laboratory and field activities. Copies of the applicable SWAMP QAPrP, Quality Assurance Project Plans (QAPPs), and Standard Operating Procedures (SOPs) are available on the [SWAMP Quality Assurance website](#).
