Informational Webinars for Unified Program Agencies and the Regulated Underground Storage Tank Community on the Adopted Amendments to California Code of Regulations, Title 23, Division 3, Chapter 16

The State Water Resources Control Board (State Water Board) adopted amendments to California Code of Regulations, title 23, division 3, chapter 16 at the State Water Board's June 5, 2018 Board Meeting. The adopted amendments to the regulations include, but are not limited to: 1) designated underground storage tank (UST) operator inspections; 2) overfill prevention equipment inspections; 3) testing and inspecting equipment after a repair; 4) demonstrating compatibility; 5) training of employees, and 6) line leak detection of piping connected to emergency generator tank systems. In preparation for the Office of Administrative Law's approval of the amendments, the State Water Board is conducting webinars to ensure Unified Program Agencies (UPAs) and the regulated UST community understand the amendments to regulation prior to implementation.

The webinars for UPAs are to provide information to assist UST regulators in verifying that UST owners and operators are complying with the amended regulations and includes, but is not limited to, the review of California Environmental Reporting System submittals, required forms, compatibility documentation, workplans for installation, replacement, and repairs of UST components and how the annual inspection is affected by the amendments to the UST regulations. The webinars for the regulated UST community are to provide information regarding how to comply with the amended regulations for, but not limited to, testing, inspection, UST component compatibility, upgrades, and training.
