

# Reimbursement Requests Received vs. Reviewed (April 2016)

Data Current as of 4/11/2016

- Numbers are for RR-Equivalents. One RR-Equivalent is about \$50,000 and takes about 8 hours to review to determine eligibility of costs as reasonable and necessary. One first-and-only RR is often about 15 RR-equivalents. The actual number of RRs received or reviewed is less than the number of RR-equivalents depending on the number of first-and-only RRs. In order to reimburse the amount budgeted annually for claim reimbursement, the Fund has increased the number of Priority Class D claims issued Letters of Commitment.
- Reimbursement Requests Received PLUS Carryover is the number of RR-Equivalents received or projected to be received during the year, plus the RRs received that exceeds the number reviewed or projected to be reviewed.
- Reimbursement Requests Reviewed is the number of RR-Equivalents reviewed using available resources.
- Nearly all Priority Class D claims have closed cases and their first-and-only RR typically includes at least 15 years of corrective action costs for Fund review to determine eligibility.
- More RRs were reviewed than received because the program reviewed unprocessed RRs carried over from previous fiscal years.
