NOTICE IS HEREBY GIVEN THAT the State Water Resources Control Board (State Water Board) will accept comments on the proposed underground storage tank (UST) case closure for Colorado River Basin Regional Water Quality Control Board case number 7T2263001.

Health & Safety Code (H&SC) section 25296.40 allows for an owner or operator, or responsible party, who has a UST case, who believes that the corrective action plan has been satisfactory implemented, and where closure has not been granted, to petition the State Water Board for review of their case. Pursuant to State Water Board Resolution No. 2012-0061, the Executive Director of the State Water Board may close or require closure of cases that meet the criteria specified in the State Water Board's Low-Threat Underground Storage Tank Case Closure Policy adopted by State Water Board Resolution No. 2012-0016.

A Case Closure Summary has been prepared that contains information about the UST case that forms the basis for the UST Cleanup Unit staff's recommendation to the Executive Director for UST case closure. A copy of this notice has been provided to the responsible party, owner/operator, environmental consultant on record, the applicable Regional Water Quality Control Board and local agency that has been overseeing corrective action, agencies with authority to issue building permits, owners and occupants of all parcels adjacent to impacted properties, the water replenishment district, the local water purveyor, the municipal water district, county water district, and special act district with groundwater management authority specified by H&SC section 25296.40.
