STATE WATER RESOURCES CONTROL BOARD

In the Matter of Declaration)
of Fully Appropriated Stream)
Systems in California.)

ORDER: WR 91-07

SOURCES: Various Stream
Systems, Statewide

COUNTIES: All Counties
except Imperial,
San Benito, and
San Francisco

ORDER REVISING DECLARATION OF
FULLY APPROPRIATED STREAM SYSTEMS

BY THE BOARD:

1.0 INTRODUCTION

1.1 Prior Proceedings. Acting pursuant to Water Code Sections 1205 through 1207, the State Water Resources Control Board (Board) on November 16, 1989, adopted Order WR 89-25, entitled "Order Adopting Declaration of Fully Appropriated Stream Systems and Specifying Conditions for Acceptance of Applications and Registrations". That Order declared various stream systems, statewide, fully appropriated either year-round or during specified months, based upon previous water right decisions which determined that no water remains available for appropriation.¹

¹ A petition to reconsider Order WR 89-25 was filed. On February 15, 1990, the Board adopted Order WR 90-2, which made some modifications in the original order and affirmed Order WR 89-25 as modified. The modifications concerned (1) the status of the San Gregorio Creek Stream System in San Mateo County; (2) the meaning to be given to the term "stream system", for the purposes of the Declaration; and (3) specification of certain categories of pending applications which were not to be considered for cancellation.

1.2

Current Proceeding. Water Code Section 1205(c) provides that the Board may revoke or revise a declaration that a stream system is fully appropriated. Such action may be taken on the Board's own motion or on petition of any interested person and must be preceded by notice and hearing. Following notice pursuant to Water Code Section 1207, the State Board held a hearing on May 14, 1991 to determine whether to adopt a revised declaration that certain stream systems are fully appropriated. The stream systems under consideration by the State Board for inclusion, revision, and deletion were identified in an attachment (Exhibit A) to the Notice of Public Hearing in this proceeding, dated March 14, 1991, and amendments of April 15, 1991 (hereinafter, the Hearing Notice Attachment). The Notice of Public Hearing, together with the Hearing Notice Attachment, also specified, for each stream system under consideration, the season of unavailability of water for appropriation; the previous water right decision which determined that no water remains available for appropriation; and the "critical reach", that is, the segment of the stream system that is fully appropriated. Pursuant to Water Code Section 1206(b), the current proceeding also included inquiry into the conditions, if any, upon which applications to appropriate water should nevertheless be accepted.

- 1.3 Consequences of Declaration. In our previous Orders declaring certain stream systems to be fully appropriated, we noted that the statutory consequences of such determinations are as follows.
- 1.3.1 First, the Board is precluded from accepting any application to appropriate water from a specified stream system, except where the proposed appropriation is consistent with conditions contained in the Declaration.
- 1.3.2 Second, initiation of a water right pursuant to the Water Rights Permitting Reform Act of 1988 (Water Code Section 1228 et seq.)--that is, by registering small use domestic appropriations--is precluded, except where the proposed appropriation is consistent with conditions contained in the Declaration.
- 1.3.3 Third, pursuant to Water Code Section 1206(a) the Board is authorized, but not required, to cancel pending applications where inconsistent with conditions contained in the Declaration; our previous Orders implement a procedure for disposition of such applications pending on the effective date of the declaration.

1.4 Findings. Having taken official notice of previous water right decisions, and having considered the hearing presentations and supporting documentation, the Board makes the following findings.

2.0 **GENERAL FINDINGS**

2.1 Critical Reach. In our previous proceedings², we defined the scope of the term "stream system", for purposes of the Declaration, as meaning a stream named in the Declaration but limited to its reach within the county or counties under which it was identified therein. (See Order WR 90-2, Order paragraph 3.) Recognizing that county boundaries are often without hydrologic significance, we encouraged the Chief, Division of Water Rights, to recommend a revision to the Declaration which identifies stream systems by reach without regard to county boundaries. (See Order WR 90-2, Finding paragraph 3.1.) The Chief has recommended an approach which identifies stream systems, for purposes of the Declaration, by "critical reach", without regard to county boundaries.³ We find that this approach more accurately reflects hydrologic conditions and should be utilized in compiling and maintaining the Declaration. However, the Declaration

² As noted, previous proceedings in this matter produced Order WR 89-25 and, on reconsideration, Order WR 90-2.

³ The critical reach approach was used in the Hearing Notice Attachment in the current proceeding.

should continue to be organized by counties and, whenever a critical reach of a stream system lies within more than one county, it should be identified within each county in which it lies.

2.2 Finding with Regard to the Hearing Notice Attachment.

Except as found in succeeding paragraphs, the Board finds that the stream systems identified in the Hearing Notice Attachment are fully appropriated during the seasons specified therein. Reference is made to Exhibit A to this Order, entitled "Declaration of Fully Appropriated Stream Systems", and by this reference Exhibit A is incorporated into this Order as though fully set forth herein. Exhibit A consists of the stream systems identified in the hearing notice, except that Exhibit A incorporates findings (including findings related to seasons of unavailability of water for appropriation from critical reaches of specific stream systems) as set forth in Section 3.0, below.

2.3 Finding with Regard to Previous Orders. Except as specifically revoked or revised by this Order, the findings and orders contained in Order WR 89-25 and Order WR 90-2 should be confirmed.

2.4 Compilation and Maintenance of the Declaration. The Chief, Division of Water Rights, should compile and

maintain the Board's Declaration of Fully Appropriated Stream Systems, together with Conditions for Acceptance of Water Right Applications and Small Domestic Use Registrations, in accordance with the findings and orders contained in this Order. That compilation will consist of Exhibit A together with other appropriate conditions as specified in this Order.

3.0

FINDINGS RELATED TO SPECIFIC STREAM SYSTEMS AND TO THE SEASONS OF UNAVAILABILITY OF WATER AND CRITICAL REACHES THEREIN

Based upon the water right decisions officially noticed; upon presentations and exhibits and supporting documentation presented by interested persons at the hearing of May 14, 1991; upon information provided by staff and made part of the record of that hearing; and upon other matters officially noticed; the Board makes the following findings with respect to the stream systems under consideration. The stream systems upon which findings are made are organized by county. Subsequent sections of this Order address matters of general import.

3.1

Alpine County

Decisions 858 and 1109 (Mokelumne River). Amador County Water Agency submitted written testimony stating that Decisions 858 and 1109 did not determine that no water remains available for appropriation from July 1

through December 1. Instead, the Agency urges that Decision 858, to which reference is made in Decision 1109, determined that water is available for appropriation from December 1 to July 1 and therefore that the season of unavailability should be July 2 through November 30. Upon further review we find that Decision 858 determined that unappropriated water is available from December 1 to, but not including, July 1. Thus, the season of unavailability should be from July 1 through November 30.

3.2 Amador County

Decisions 858 and 1109 (Mokelumne River). (See paragraph 3.1.1, above.)

3.3 Calaveras County

Decisions 858 and 1109 (Mokelumne River). (See paragraph 3.1.1, above.)

3.4 San Joaquin County

Decisions 858 and 1109 (Mokelumne River). (See paragraph 3.1.1, above.)

3.5 Fresno County

Decisions 1018, 1432, and 1435 (Tule River). The Tule River Watermaster questioned deletion of Decisions 1018 and 1432 from the Declaration. He urged that these

decisions should remain in the Declaration since Decision 1435 considered only Sand Creek and not the entire Tule River System. The Watermaster also asked that in Tulare County the stream system should be identified as the Tule River System, expressing concern about the description of the critical reach since there is no hydraulic continuity to the Tule River or Tulare Lake Basin. He asked that identification of the critical reach be changed to assure that tributaries within the Tule River System--including the Kaweah River System--be included. All applications under consideration in the proceeding which led to Decision 1018 sought appropriation from the Tule River System above Success Dam and all protestants were located below Success Dam. The evidence showed that the waters of the Tule River had been completely used under claim of prior right, during all but infrequent flood years, in the Tule River Delta and Tulare Lake area, and that water which might be appropriated during flood years occurs too irregularly and infrequently to be of any value to the applicants. The Board determined that no usable unappropriated water in the Tule River and tributaries was available for the applicants. Decision 1432 involved applications to appropriate water from the North and Middle Forks Tule River in Tulare County. The decision found that no unappropriated water was available to satisfy the applications since evidence

was not presented to contradict the findings of Decision 1018; except for infrequent floods, no unappropriated water existed in the Tule River or its tributaries. Decision 1435 involved applications to appropriate water from Sand Creek, a tributary of the Tule River in Fresno County. The decision concluded that water in the Tule River System reaching Tulare Lake is placed to beneficial use by diverters from the lake, and that the last time water flowed from Tulare Lake was in 1878. Both subsequent decisions refer to Decision 1018 or find that unappropriated water had not been available since 1878. Decision 1435 was identified in the Hearing Notice Attachment because it is the most recent decision and it confirms the prior determinations on the Tule River System. However, Decisions 1018 and 1432 should be restored to the Declaration as references. We also agree that the word "System" should be added to the name of this stream system in its identification in Tulare County.

3.6

Kings County

Decisions 1018, 1432, and 1435 (Tule River). (See paragraph 3.5, above.)

3.7

Los Angeles County

Upper San Gabriel Valley Municipal Water District v. City of Alhambra (Los Angeles County Superior Court

No. 924128) (San Gabriel River Watershed). Thomas Stetson, of Stetson Engineering Inc., submitted written testimony supporting the determination that the San Gabriel River Watershed is fully appropriated. With regard to the critical reach, Mr. Stetson noted that the San Gabriel River bifurcates in the upper portion of San Gabriel Valley at Santa Fe Dam and that its distributary, the Rio Hondo, flows separately through Whittier Narrows to join the Los Angeles River near the City of South Gate. Since the Rio Hondo has several tributaries not directly tributary to the San Gabriel River, Mr. Stetson suggested that the Rio Hondo, as a distributary of the San Gabriel River, be specifically identified in the Declaration as fully appropriated. However, the Declaration identifies the San Gabriel River Watershed, a term which is intended to include all tributaries, distributaries, and tributaries to distributaries of the San Gabriel River. It is, therefore, unnecessary to identify the Rio Hondo separately.

3.8

Marin County

Decision 1582 (Lagunitas Creek). Oral testimony and written statements were presented by Ms. Anne West, representing the Marin Sierra Club; by Mr. John West, representing the Tomales Bay Association; and by Mr. Stewart Bryant, representing the Inverness

Association. These presentations urged that Lagunitas Creek be declared fully appropriated year-round. The participants cited Water Code Sections 1243 and 1243.5 as authority. These provisions declare that the use of water for recreation and enhancement of fish and wildlife resources is a beneficial use of water. In determining the amount of water available for appropriation for other beneficial uses, the Board must take into account, whenever it is in the public interest, the amounts of water required for recreation and the preservation and enhancement of fish and wildlife resources. However, these provisions apply only to proceedings on applications to appropriate water. The instant proceeding concerns declarations that certain stream systems are fully appropriated. Pursuant to Water Code Section 1205(a), the Board must support any such declaration by finding that a previous water right decision--such as a decision arising from a proceeding on an application--determined that no water remains available for appropriation. Decision 1582 ordered interim instream flow levels' for Lagunitas Creek and reserved continuing authority to order final instream flow conditions. The Board is proceeding to set a public hearing date to take evidence on final instream flow conditions in late 1991, and interested parties will be notified. We understand, however, that the participants' concerns are broader than the issues

likely to be addressed in the further hearing on Lagunitas Creek contemplated by Decision 1582 and include conditions in Tomales Bay itself. In this regard, we note that in Order WR 89-25 we authorized the Chief, Division of Water Rights, to propose administrative rules for adoption by the Board whereby interested persons could participate in the process required to determine whether a stream system should be added to the Declaration. When promulgated, these rules may assist participants in addressing their broader concerns.⁴

3.9

Mendocino County

Decisions 1110, 1142, 1151, and 1610 (Russian River).

The Mendocino County Russian River Flood Control and Water Conservation Improvement District (hereinafter, the Mendocino District) made oral and written presentations urging that interpretation of the findings of Decision 1110 that no water remained available for appropriation from July 1 through October 31 is erroneous. The Mendocino District contends that Decision 1610 modified Decision 1110. The Mendocino District also asked that the description of the critical reach pursuant to Decision 1110 be modified to read as follows:

⁴ Staff is urged to expedite promulgation of the rules envisioned in Order WR 89-25.

From the Russian River main stem located at the gauging station in Guerneville upstream, excluding all tributaries and not including applications to appropriate Russian River water in Mendocino County or water stored in Lake Mendocino in excess of that storage necessary to ensure the reliability of the reservoir.

We recognize that the water rights situation in the Russian River Stream System is a highly complex subject. It was briefly addressed in Order WR 89-25, in response to the presentation of the Mendocino County Water Agency. In view of the contention of the Mendocino District, it is appropriate to further develop the question of the season of unavailability of water for the purpose of the Declaration.

Decision 1610 found that, because of the coordinated operation of Lake Sonoma and Lake Mendocino together with the new schedule of minimum flows⁵ for the Russian River required by Decision 1610, unappropriated water would be available in most months in the Russian River at the Wohler and Mirabel diversion points based on 1985 demand levels. However, the decision found that under year 2020 demand levels often no water would be available for direct diversion during the months of June through September pursuant to permitted

⁵ The State Board, in Decision 1610, ordered that the responsibility for maintaining minimum flows in the Russian River be placed solely on the water right permits held by the Sonoma County Water Agency.

Application 19351 held by Sonoma County Water Agency.

(See Decision 1610, Page 9.)

Decision 1610 also noted that insufficient water is available to fully serve all of the beneficial uses of water from the Russian River and its tributaries upstream of Healdsburg. Consequently, after the 10,000 acre-foot per annum reservation for use in the Russian River Valley in Sonoma County and the 8,000 acre-foot per annum allotment for use from the Russian River in Mendocino County under Permit 12947B of the Mendocino District⁶ are exhausted, no further permits should be approved for water from the Russian River or any tributary with surface or subsurface hydraulic continuity therewith, without an affirmative showing by the applicant that water can be diverted without affecting the minimum flows, or can be diverted under other rights or from other sources during the periods when no unappropriated water is available. (See Decision 1610, pages 27-28.) It is possible, however, that such diversions could be made under area-of-origin protection restrictions contained in Sonoma County Water Agency's permits. (See Order WR 89-25, Section 9.0.)

⁶ Water for the referenced reservation and allotment is provided by the Russian River Project, which originally included Lake Mendocino and more recently includes Lake Sonoma.

Although the minimum instream flow requirements established by Decision 1110 were modified by Decision 1610, Decision 1610 did not find that unappropriated water is now available for appropriation outside the above-referenced 10,000 acre-foot per annum reservation in Sonoma County and the 8,000 acre-foot per annum allotment for Mendocino County. Instead, as noted above, Decision 1610 found that unappropriated water is not available upstream of Healdsburg and probably would not be available under year 2020 demands at Wohler/Mirabel from June through September. Consequently, Decision 1110 should remain in the Declaration for the Russian River in Mendocino County, showing a season of unavailability of water from July 1 through October 31. In addition, Decision 1610 should be added to the Declaration to reaffirm the unavailability of water in the Russian River upstream of Healdsburg. Further, State Water Resources Control Board Order WR 74-30 should be added to the Declaration, and in accordance therewith the season of unavailability should be footnoted and the critical reach modified to reflect the following:

(1) that the Declaration restrictions apply only to (a) diversions from the main stem of the Russian River between the Mendocino/Sonoma county line and the confluence of the East Fork Russian River

that have been commenced after January 28, 1949 (those before this date being assured water, as a prior right, by the Russian River Project), (b) the tributary watershed of that portion of the Russian River upstream of said confluence, commonly known as the West Fork Russian River, and (c) the East Fork Russian River watershed, excluding Potter Valley; and

(2) that until the 8,000 acre-foot per annum allotment under the Mendocino District's Permit 12947B is depleted, individual diversions from the main stem of the Russian River in Mendocino County can be made under individual appropriations, excluding the period from July 1 to October 31, with the understanding that during the latter period diversions can continue to be made under, and will be charged to, the Mendocino District permit. We note that this is different from the procedure instituted in Sonoma County as a result of Order WR 74-30, whereby individual diversions from the Russian River can be made under individual year-round appropriations, with the quantities so diverted during July through October being accounted against the 10,000 acre-foot per annum reservation for the Russian River Valley as part of the Russian River Project.

In addition, Decision 1258 concluded water was unavailable from July 1 through October 31 in the Russian River based on Decisions 1030, 1110, and 1142. Decision 1258 is redundant and should be deleted from the declaration.

3.10 Orange County

3.10.1 Decision 1194 (Santa Ana River Watershed and Unnamed Spring Tributary to Pine Canyon). The City of Orange (City) made oral and written presentations urging that

Santiago Creek, tributary to the Santa Ana River, not be included as fully appropriated under Decision 1194 since the flow of Santiago Creek was not specifically considered in Decision 1194. The City has filed an application to appropriate water from Santiago Creek and has a pending complaint on file with the Board. The City also suggested that administrative rules proposed pursuant to Order WR 89-25 (see paragraph 3.8, above) provide for consideration of the existence of a pending complaint concerning a particular stream system in taking action pursuant to Water Code Section 1205. Decision 1194 found that no unappropriated water existed in the Santa Ana River Watershed, citing Orange County Water District v. Riverside, 188 Cal.App.2d 566 (1961)). In addition, a subsequent Board water right decision concerning an unnamed spring tributary to Pine Canyon, tributary to Santiago Creek, thence Santa Ana River, discussed and evaluated the water rights on Santiago Creek. (See Staff Analysis - Minor Protested Application, July 3, 1989, pages 4-5.) This decision concluded that only in rare circumstances would sufficient water be available in Santiago Creek to satisfy all existing rights. The decision determined that all the waters of Santiago Creek are fully appropriated and no water remains available for appropriation. Accordingly, the Santa Ana River Watershed should continue to be declared fully

appropriated year-round, including Santiago Creek. With regard to including a provision for considering a pending complaint in the proposed administrative rules, we note that if it appeared that both a pending application and a pending complaint raised similar issues, the matters could be consolidated for hearing. The City's suggestion on this point should be considered by staff in connection with its proposal for administrative rules.

3.10.2 Decision 1194 (Santa Ana River Watershed). The Orange County Water District made oral and written presentations supporting the declaration that the Santa Ana River is fully appropriated. The District noted that the Staff Analysis - Minor Protested Application, July 3, 1989 (see paragraph 3.10.1, next above) confirmed the finding of Decision 1194 with respect to Santiago Creek.

3.11 Riverside County

3.11.1 Decision 496 (Snow Creek). The Desert Water Agency submitted a written presentation pointing out that, pursuant to Decision 496, Snow and Strawberry Creeks are both tributary to the Whitewater River and not to the Santa Ana River. After further review of Decision 496, staff recommended at the hearing of May 14, 1991, that the Declaration be modified to show Snow and

Strawberry Creeks tributary to Whitewater River. However, these streams need not be specifically identified in the Declaration since the Whitewater River Adjudication covers Decision 496.

3.11.2 Decision 896; Rancho Santa Margarita v. Vail (San Diego County Superior Court, Civil No. 42850) (Santa Margarita River). (See Paragraph 3.13, below.)

3.12 Sacramento County

Decision 925 (Elk Grove Creek). Mr. Dale Cyphert made a written and oral presentation urging that unappropriated water is available during the irrigation season from an unnamed stream tributary to Whitehouse Creek, thence Laguna Creek, to which Elk Grove Creek is tributary. Further, Mr. Cyphert believed the increase in availability of water is due to residential development in the Elk Grove area. Mr. Cyphert's testimony was based on his personal observations. He has a small domestic registration pending acceptance by the Board.

Decision 925 will not impact the Cyphert's small domestic use registration since the critical reach is located from the confluence of Elk Grove Creek and Laguna Creek and extends upstream on Elk Grove Creek. The unnamed stream from which the Cyphert's propose to

divert is not tributary to Elk Grove Creek. However, Decision 1186 on Morrison Creek in Sacramento County, to which Laguna Creek is tributary, found that water was unavailable from June 1 through October 31. The critical reach on Decision 1186 extends upstream to and includes the tributary from which Mr. Cyphert intends to divert from. Therefore, the season of availability for Mr. Cyphert should be limited to November 1 through May 31.

The current proceeding is not structured to take hydrologic data or other information presented to show that conditions have changed since issuance of the decision relied upon as noted in Order WR 89-25. Opportunity will be afforded interested persons to seek revision of the Declaration by making showings of the type urged here by Mr. Cyphert.

3.13

San Diego County

Decision 896; Rancho Santa Margarita v. Vail (San Diego County Superior Court, Civil No. 42850) (Santa Margarita River). Mr. R. H. James made an oral presentation suggesting that the word System be added to the Declaration's identification of the Santa Margarita River. Decision 896 denied an application to appropriate water both by storage on Temucula Creek, tributary to the Santa Margarita River, and by direct

diversion from the Santa Margarita River. The decision referred to a judgment in a judicial action entitled Rancho Santa Margarita v. Vail (San Diego County Superior Court, Civil No. 42850). In turn, that judgment found that there is only enough water available in the Temecula-Santa Margarita River for irrigation of a portion of the demands of riparian lands.⁷ Therefore, no unappropriated water is available in the Santa Margarita River from the Pacific Ocean upstream. Accordingly, the word System should be added to the identification of the Declaration's identification of the Santa Margarita River.

3.14

San Mateo County

San Gregorio Creek Adjudication (San Gregorio Creek).

Ms. Helen Carey submitted a written communication urging that her pending application in the San Gregorio watershed not be canceled. Order WR 89-25 and, on reconsideration, Order WR 90-2, made specific findings and determinations with regard to San Gregorio Creek, which continues to be the subject of an adjudication pursuant to Water Code Section 2500. Ms. Carey's communication did not present any information relevant to the question whether the prior water right decision

⁷ On appeal this finding was not questioned. The Supreme Court noted that the finding was supported by the evidence and that it "was one of the basic facts upon which the action was tried." Rancho Santa Margarita v. Vail, 11 Cal.2d 501, 81 P.2d 533 (1938).

relied upon by the Board, i.e., the Order of Determination in the San Gregorio Creek Adjudication, is erroneous. However, Ms. Carey's pending application (Application 29481) proposes a season of diversion from November 1 through May 31. Exhibit A shows the season of unavailability of water in San Gregorio Creek Stream System to be from June 1 through October 31. Accordingly, Ms. Carey's pending Application 29481 is not inconsistent with the season of unavailability of water as shown in Exhibit A.

3.15

Santa Clara County

Decision 306 (Coyote River). William Dunn presented an oral statement that the critical reach listed in Decision 306 should read "from Edenvale upstream", not "from the Coyote River upstream" as shown in the Hearing Notice Attachment. Review of Decision 306 indicates that the critical reach should be identified as follows:

"... from the Coyote River located at the gaging station at Edenvale within T8S, R2E, MDB&M upstream, including all tributaries where hydraulic continuity exists."

The declaration should be modified accordingly.

3.16

Sierra County

Decision 1444 (Long Valley Creek). Mr. Clare Mahannah, Water Research and Development Inc., made written and

oral presentations, including hydrologic data, to show that unappropriated water is available for pending Applications 29141-29143 in Long Valley Creek System from October 1 through June 15 of the succeeding year. Mr. Mahannah's presentation did not dispute the finding of Decision 1444. Instead, he asked the State Board to reconsider that Decision's season of unavailability based on the new hydrologic data. Staff has included this hydrologic data in the record of the pending applications since the current proceeding is not the forum for determining whether unappropriated water is available to supply pending Applications 29141-29143. That determination will be made at a later date, in connection with the proceeding on the specific applications.

3.17

Sutter County

Decision: various (Colusa Drain in Colusa County and Sutter Bypass). The Colusa Drain Mutual Water Company and Sutter-Butte Mutual Water Company requested that the Board recognize, as an exception from the legal effects of the Declaration, contracted water from the United States Bureau of Reclamation which makes up for any water right deficiency in the event that the Declaration shows that no water is available for appropriation during a portion of the year. This point

is valid and is addressed, together with related matters, in paragraph 5.1, below.

3.18 Tulare County

Decisions 1018, 1432, and 1435 (Tule River). (See paragraph 3.5, above.)

4.0 **DECISIONS ADDRESSING LARGER STREAM SYSTEMS**

4.1 Decision 1594 (The Sacramento-San Joaquin Delta and tributaries). The Contra Costa Water District made an oral presentation regarding Decision 1594. Concern was expressed that, since Decision 1594 regulates diversions on a "real time" basis, the Declaration not prevent the diversion of water at times when surplus water is available, if availability occurs after June 15. For diversions greater than 1 cubic foot per second or greater than 100 acre-feet annually by storage, Decision 1594 would allow diversion at any time when surplus water is available; the Declaration is not intended and should not be interpreted to restrict such diversions.

4.2 Wild and Scenic Rivers. A number of comments were received regarding adding the State and Federal Wild and Scenic Rivers to the Declaration. The purpose in adding these stream systems was to recognize the restrictions on appropriation of water contained in the

respective State and Federal acts. These restrictions will be implemented by the Board as they have in the past.

5.0 **OTHER MATTERS**

In administering the Declaration, the Chief, Division of Water Rights, should be guided by the following findings:

5.1 Water Service Contracts, Water Transfers, and Water Exchanges

As noted in paragraph 3.17 above, transactions may occur which, in effect, make water available for diversion and use by specific persons from stream systems wherein water is not otherwise available for appropriation. These transactions include water service contracts and water transfers, where a natural stream channel is used for delivery (see Water Code Section 7075), and water exchanges. Under certain circumstances the Board requires that an application be filed and permit issued.⁸ In such cases, the Declaration should not preclude acceptance of the application nor should any such pending applications be canceled. The application process will help assure

⁸ In most cases the water right impact of these transactions may be dealt with through the various change procedures set forth in the Water Code. (See, e.g., Water Code Section 1700 *et seq.*) Proposed changes in point of diversion, place of use, and purpose of use are specifically exempt from the legal consequences of a declaration that a stream system is fully appropriated. (See Water Code Section 1206(c).)

protection of other lawful users of water and instream uses.

5.2 Hydraulic Continuity

In Order WR 89-25 we noted that limitations on availability of unappropriated water in a particular stream should generally apply to tributary streams "if, and to the extent that, such tributary is hydraulically continuous to the downstream system." (Order WR 89-25, paragraph 3.25.5.3.) For clarification, we find that the converse is also true. Where, and to the extent that, a tributary is not hydraulically continuous to the downstream system, the tributary should not be governed by the limitations on the downstream system.

5.3 State Filings

In Order WR 89-25 we provided for continued acceptance of petitions for assignment of State filings and of petitions for release of priority of State filings in favor of conventional applications, and we ordered that pending State filings not be considered for cancellation. We found that otherwise the legislative objective underlying the State filing system would be frustrated. This consideration does not, however, exist with regard to new State filings on stream systems declared to be fully appropriated. New State filings should not be accepted on such stream systems

where inconsistent with conditions contained in the Declaration.

6.0 RECONSIDERATION OF THIS ORDER

Provision should be made for reconsideration of this Order, either upon petition of an interested party or upon the Board's own motion.

ORDER

IT IS HEREBY ORDERED, based upon the foregoing findings, that:

1. Exhibit A is hereby adopted as the State Water Resources Control Board's (Board) Declaration of Fully Appropriated Stream Systems.
2. The Chief, Division of Water Rights, shall recompile and maintain the Board's Declaration of Fully Appropriated Stream Systems, together with Conditions for Acceptance of Water Right Applications and Small Domestic Use Registrations, in accordance with the findings in this Order.
3. Except as specifically revoked or revised by this Order, the findings and orders contained in Order WR 89-25 and Order WR 90-2 are confirmed.

///

///

///

4. Water Code Sections 1357, 1358, and 1359, relating to reconsideration and amendment of decisions and orders, shall apply to the instant Order.

CERTIFICATION

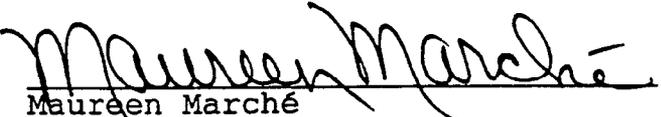

The undersigned, Administrative Assistant to the State Board, does hereby certify that the foregoing is a full, true, and correct copy of an order duly and regularly adopted at a meeting of the State Water Resources Control Board held on August 22, 1991.

STATE WATER RESOURCES CONTROL BOARD
REVISIONS TO EXHIBIT A
WATER RIGHT ORDER 89-25
DECLARATION OF FULLY APPROPRIATED STREAM SYSTEMS
AUGUST 22, 1991

- Notes:
- (1) This order should be consulted for other conditions under which applications to appropriate water from the listed systems may be accepted for filing.
 - (2) Applicable statutes and regulations provide for revision of a declaration that a stream system is fully appropriated. The State Water Resources Control Board, Division of Water Rights, should be contacted to obtain the version of this Declaration which is currently in effect.

STATE WATER RESOURCES CONTROL BOARD
DECLARATION OF FULLY APPROPRIATED STREAM SYSTEMS

EXPLANATION OF NOTATIONS IN THE DECLARATION

Attached are the revisions to Exhibit A of Water Right Order 89-25, Declaration of Fully Appropriated Stream Systems adopted by the State Water Resources Control Board on August 22, 1991.

Footnotes:

- (1) including all tributaries where hydraulic continuity exists.
- (2) In accordance with Public Resources Code, Division 5, Chapter 1.4. California Wild and Scenic Rivers Act, Section 5093 et seq, it is the policy of the State of California, that certain rivers which possess extraordinary scenic, recreational, fishery, or wildlife values shall be preserved in their free-flowing state, together with their immediate environments, for the benefit and enjoyment of the people of the state. The Legislature declares that such use of these rivers is the highest and most beneficial use and is a reasonable and beneficial use of water within the meaning of Section 2 of Article X of the California Constitution.
- (3) In accordance with U.S.C.S., Title 16, Chapter 28. Federal Wild and Scenic Rivers Act, Section 1271 et seq, it is hereby declared to be the policy of the United States that certain selected rivers of the Nation which, with their immediate environments, possess outstandingly remarkable scenic, recreational, geologic, fish and wildlife, historic, cultural, or other similar values, shall be preserved in free-flowing condition, and that they and their immediate environments shall be protected for the benefit and enjoyment of present and future generations. The Congress declares that the established national policy of dam and other construction at appropriate sections of the rivers of the United States needs to be complemented by a policy that would preserve other selected rivers or sections thereof in their free-flowing condition to protect the water quality of such rivers and to fulfill other vital national conservation purposes.

Note: Additional footnotes are included at the bottom of page where noted.

Miscellaneous Notations:

* Water Code, Chapter 5, Article 1.5, Section 1345 et seq provides that the State Water Resources Control Board (State Board) Division of Water Rights shall conduct a field investigation and prepare a staff analysis of all minor protested applications. State Board action results in a decision being rendered on the application.

** California Wild and Scenic Rivers Act, Section 5093 et seq

*** Federal Wild and Scenic Rivers Act, Section 1271 et seq

0000 Adjudicated Water Rights

Abbreviations:

Dec. = decision number refers to a number on a water right decision. This number is for reference purposes.

Stream = name of stream

Tributary = source to which the stream is tributary.

Season of Unavailability = The dates reflect the beginning and ending dates when unappropriated water is unavailable for appropriation, based on a prior water right decision.

Sec.	=	Section on U.S. Geological Survey Quadrangle Map	afa	=	acre feet annually
T	=	Township	cfs	=	cubic feet per second
R	=	Range	gpd	=	gallons per day
MDB&M	=	Mount Diablo Base and Meridian			
HB&M	=	Humboldt Base and Meridian			
SBB&M	=	San Bernardino Base and Meridian			

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Alameda 0375	Agua Caliente Creek	San Francisco Bay	04/15-09/30	from where Agua Caliente Creek enters tidal marsh in San Francisco Bay upstream (1)	

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Alpine **	Carson River		01/01-12/31(2)	the East Fork from the Hangman's Bridge crossing of State Highway Route 89 to the California-Nevada border	
Alpine 0000	East Fork Carson River	Carson River	04/01-11/30	from the Nevada County line upstream (1)	
Alpine 0000	West Fork Carson River	Carson River	04/01-11/30	from the Nevada County line upstream (1)	
Alpine 0000	Stanislaus River Stream System	San Joaquin River	04/01-11/30	from the confluence of the San Joaquin River upstream (1)	
Alpine 0609	Shay Creek	East Fork Carson River	01/01-12/31	from the confluence with Hot Springs Creek upstream (1)	
Alpine 1109	Mokelumne River	San Joaquin River	07/01-11/30	from the Woodbridge Irrigation District's point(s) of diversion upstream (1)	
Alpine 1422	Stanislaus River	San Joaquin River	07/01-10/31	from the confluence with the San Joaquin River upstream (1)	
Alpine 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)	

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County				August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach
Amador 0684	South Fork Cosumnes River	Middle Fork Cosumnes River	04/15-10/31	from the confluence with Middle Fork Cosumnes River upstream (1)
Amador 0976, 1109	Jackson Creek	Dry Creek thence Mokelumne River	04/01-11/30	from the confluence with Dry Creek upstream (1)
Amador 1109	Mokelumne River	San Joaquin River	07/01-11/30	from the Woodbridge Irrigation District's point(s) of diversion upstream (1)
Amador 1311	Unnamed Stream (NW¼ NW¼, Sec 6, T6N, 12E, MDB&M)	Jackson Creek	04/01-09/30	from the confluence of New York Ranch Gulch with Jackson Creek upstream (1)
Amador 1369	Cosumnes River	Mokelumne River	07/01-10/31	from the confluence with the Mokelumne River upstream (1)
Amador 1397, 1219	Pioneer Creek	Sutter Creek	04/01-12/01	from the confluence with Sutter Creek upstream (1)
Amador 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County				August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach
Butte ***	Middle Fork Feather River	Feather River	01/01-12/31 (3)	the entire Middle Fork downstream from the confluence of its tributary streams one kilometer south of Beckwourth, CA
Butte 0000	Butte Creek	Butte Slough	04/01-11/30	from the confluence of Butte Sink located in T17N, R1E, MDB&M upstream (1)
Butte 0000	Dry Creek	Cherokee Canal	04/01-11/30	from the confluence of Butte Sink located in T17N, R1E, MDB&M upstream (1)
Butte 0000	Pine Creek	Sacramento River	04/01-11/30	from the confluence of Pine Creek and the Sacramento River upstream (1)
Butte 0367	Empire Creek	W.Branch of N.F. Feather River	06/01-10/31	from the confluence with the West Branch of the North Fork Feather River upstream (1)
Butte 0528	Honcut Creek	Feather River	04/01-10/31	from the confluence of the Feather River upstream (1)
Butte 0844	West Branch Feather River	Feather River	07/01-11/30	from the upper Miocene Canal Head Dam on West Branch Feather River located in Section 30, T23N, R4E, MDB&M, upstream (1)
Butte 1275	Feather River	Sacramento River	07/01-09/30	from the confluence of the Feather River and Sacramento River upstream (1)
Butte 1329	Butte Creek	Butte Slough thence Sacramento River	06/01-09/30	from the confluence with Butte Slough upstream (1)
Butte 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991

Siskiyou 0381	McKinney Creek	Klamath River	03/01-10/31	about 1-1/2 miles downstream from the point of diversion on McKinney Creek upstream (1)	
Siskiyou 0416	East Fork of South Fork Salmon River	Salmon River	07/15-11/30	at a point on the East Fork of South Fork Salmon River located within T39N, R10W (Shadow Creek Campground) upstream (1)	
Siskiyou 0545	Douglas Creek	Klamath River	06/01-10/31	from a point on Douglas Creek located within the NE¼ of NW¼, Section 19, T15N, R7E, MDB&M upstream (1)	
Siskiyou 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)	

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Solano 0424	Miller Canyon Creek	Pleasants Creek thence Putah Creek	06/01-10/31	from a point where Pleasants Creek and Pleasants Valley Road intersect located within Section 1, T7N, R2W, MDB&M upstream (1)	
Solano 1289	Union Creek	Hill Slough thence Suisun Bay	03/01-10/31	from the point of diversion on Union Creek downstream about ¼ mile upstream (1)	
Solano 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)	

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Sonoma 0302	Porter Creek	Mark West Creek	05/01-10/31	above 7 miles downstream below the junction of Porter Creek with Mark West Creek upstream (1)	
Sonoma 0663	Green Valley	Russian River	06/15-10/31	from the point of diversion on Green Valley Creek downstream approximately 6 miles upstream (1)	
Sonoma 0709	Atascadero Creek	Green Valley Creek	06/15-10/31	from the confluence of Green Valley Creek upstream (1)	
Sonoma 0852, 0691	Laguna De Santa Rosa	Mark West Creek thence Russian River	06/01-10/31	from Laguna De Santa Rosa and North of Molino (Occidental) Road located within Section 26, T7N, R9W, MDB&M upstream (1)	
Sonoma 1004	Sonoma Creek	San Pablo Bay	07/01-09/30	on Sonoma Creek below the gaging station located at Boyes Hot Springs upstream (1)	
Sonoma 1038	Santa Rosa Creek	Laguna De Santa Rosa	06/01-10/31	from Santa Rosa Creek located at the point within Section 18, T7N, R8W, MDB&M upstream (1)	
Sonoma 1537	Unnamed Stream (SW¼ SW¼, Sec 5, T9N, R8W, MDB&M)	Russian River	06/01-10/31	from the point of diversion immediately downstream and upstream (1)	
Sonoma 1608	Unnamed Stream (SE¼ SE¼, Sec 36, T11N, R10W, MDB&M)	Gill Creek thence Russian River	06/01-09/30	from the confluence of Gill Creek and the unnamed stream located within Projected Section 1, T10N, R10W, MDB&M upstream (1)	

DECLARATION OF FULLY APPROPRIATED STREAMS

Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Trinity 0850	Tule Creek	Main Tule Creek thence South Fork Trinity River	06/01-10/31	approximately 3/4 mile downstream from the applicant's point of diversion upstream (1)	
Trinity 1029	Deer Creek	Trinity River	07/01-11/30	from the confluence of the Trinity River upstream (1)	
Trinity 1584	Unnamed Stream (SE¼ NE¼, Sec 35, T33N, R10W, MDB&M)	Trinity River	05/01-10/31	from the confluence of the unnamed stream and the Trinity River upstream (1)	

DECLARATION OF FULLY APPROPRIATED STREAMS

County				
August 22, 1991				
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach
Tulare ***	North Fork Kern River	Kern River	01/01-12/31 (3)	the segment of the main stem from the Tulare-Kern County line to its headwaters in Sequoia National Park
Tulare ***	South Fork Kern River	Kern River	01/01-12/31 (3)	the segment of its headwaters in the Inyo National Forest to the southern boundary of the Domelands Wildernesss in the Sequoia National Forest
Tulare 0959	Poso Creek	Tulare Lake Basin	06/15-10/31	the termination of Poso Creek located within T26S, R24E, MDB&M near McFarland and upstream. Poso Creek goes intermittent just below the confluence of Poso Creek and Little Poso Creek located within T27S, R30E, MDB&M at Pine Mountain
Tulare 1290	Kings River System	Tulare Lake Basin	01/01-12/31	from Tulare Lake Basin upstream (1)
Tulare 1435, 1018, 1432	Tule River System	Tulare Lake Basin	01/01-12/31	from the terminus at Tulare Lake Basin upstream including all tributaries in the Tule River System where hydraulic continuity exists during any part of the year
Tulare 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Tuolumne ***	Tuolumne River	San Joaquin River	01/01-12/31 (3)	the main river from its sources on Mount Dana and Mount Lyell in Yosemite National Park to Don Pedro Reservoir consisting of approximately 83 miles as depicted on the proposed boundary map entitled "Alternative A" contained in the Draft Tuolumne Wild and Scenic River Study and Environmental Impact Statement	
Tuolumne 0000	Stanislaus River Stream System	San Joaquin River	04/01-11/30	from the confluence with the San Joaquin River upstream (1)	
Tuolumne 0995	Tuolumne River	San Joaquin River	07/01-10/31	from Don Pedro Reservoir upstream (1)	
Tuolumne 1023	Turnback Creek	Tuolumne River	05/15-10/31	from the Tuolumne Indian Rancheria upstream (1)	
Tuolumne 1123	Sullivan Creek	Tuolumne River	06/01-10/31	from the confluence with Sullivan Creek upstream (1)	
Tuolumne 1157	Mormon Creek	Stanislaus River	05/01-10/31	from a point located within the S-1/2 of Section 22, T2N R14E, MDB&M upstream (1)	
Tuolumne 1422	Stanislaus River	San Joaquin River	07/01-10/31	from the confluence with the San Joaquin River upstream (1)	
Tuolumne 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)	

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Ventura *	Cozy Dell Canyon	Ventura River	01/01-12/31	from the confluence of Cozy Dell Canyon and the Ventura River upstream (1)	
Ventura 0721	Reeves Creek	Thatcher Creek thence San Antonio Creek	06/01-10/31	from Section 3, T4N, R22W, SBB&M upstream (1)	
Ventura 0741	Santa Ana Creek	Lake Casitas	01/01-12/31	from Lake Casitas upstream (1)	

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Yolo 1079	Willow Slough	Yolo Bypass	04/01-10/31	from the confluence of Willow Slough and the Yolo Bypass upstream (1)	
Yolo 1506	Cache Creek	Yolo Bypass	04/15-10/31	from the confluence with the Yolo Bypass upstream (1)	
Yolo 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)	

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.

DECLARATION OF FULLY APPROPRIATED STREAMS

County					August 22, 1991
Decision No.	Stream	Tributary	Season Begin-End	Critical Reach	
Yuba 528	Honcut Creek	Feather River	04/01-10/31		
Yuba 1091	Bear River	Feather River	05/01-11/30	from Camp Far West Reservoir upstream (1)	
Yuba 1275	Feather River	Sacramento River	07/01-09/30	from the confluence of the Feather River and the Sacramento River upstream (1)	
Yuba 1476	South Honcut Creek	Honcut Creek	04/15-10/31	from the confluence of South Honcut Creek and the Feather River upstream (1)	
Yuba 1594	Sacramento-San Joaquin Delta	Delta above Collinsville	06/15-08/31 (a)	from the Delta upstream (1)	

(a) For diversions less than one cfs or less than 100 afa of storage, no diversion is allowed from June 16 through August 31.
