11. CONSERVATION AND MONITORING  
a. What methods will you use to conserve water? Explain.  
The automation of the District's canal system has increased the flexibility in timing deliveries and reducing spills, and accurately measures water delivery volumes through metering. Using the District's SCADA system will ensure water conservation while conveying surface water supplies to the farmers. The District encourages the farmers to participate in irrigation scheduling using the CIMIS network for on-farm application of agricultural water.  

b. How will you monitor your diversion to be sure you are within the limits of your water right and you are not wasting water? ☐ Weir ☑ Meter ☐ Periodic sampling ☐ Other (describe)  
Using ultrasonic doppler technology. The District will prevent flooding in high precipitation events by utilizing the SCADA system, monitoring the forecasted hydrologic conditions on Cache Creek, and coordinating operations accordingly.  

12. RIGHT OF ACCESS  
a. Does the applicant own all the land where the water will be diverted, transported and used?  
☐ YES ☑ NO  
If NO, ☑ do ☐ do not have a recorded easement or written authorization allowing me access.  

b. List the names and mailing addresses of all affected landowners and state what steps are being taken to obtain access:  
The District has easements that define its responsibilities for operations and maintenance of the canals.  

☐ See Attachment No. 1

13. EXISTING WATER RIGHTS AND RELATED FILINGS  
a. Do you claim an existing right for the use of all or part of the water sought by this application?  
☐ YES ☑ NO  
If YES, please specify: ☐ Riparian ☐ Pre-1914 ☐ Registration ☐ Permit ☐ License ☐ Percolating groundwater ☐ Adjudicated ☐ Other (specify)  

b. For each existing right claimed, state the source, year of first use, purpose, season and location of the point of diversion (to within quarter-quarter section). Include number of registration, permit, license, or statement of water diversion and use, if applicable.  

☐ See Attachment No. ___
c. List any related applications, registrations, permits, or licenses located in the proposed place of use or that utilize the same point(s) of diversion.
The District holds Statements S0000608, S000609, S001063, S014986, and S014987; and Permits 12848 and 12849
(Applications A011389 and A015975) for diversion and rediversion at Capay Diversion Dam

You must include a map with this application form that clearly indicates the quarter/quarter, section, township, range, and meridian of (1) the proposed points of diversion and (2) the place of use. A copy of a U.S.G.S. quadrangle/topographic map of your project area is preferred, and can be obtained from sporting goods stores or through the Internet at http://topomaps.usgs.gov. A certified engineering map is required when (1) appropriating more than three cubic feet per second by direct diversion, (2) constructing a dam which will be under the jurisdiction of the Division of Safety of Dams, (3) creating a reservoir with a surface area in excess of ten acres or (4) appropriating more than 1,000 acre-feet per annum by underground storage.
