**11. CONSERVATION AND MONITORING**

a. What methods will you use to conserve water? Explain.  
The automation of the District's canal system has increased the flexibility in timing deliveries and reducing spills, and accurately measures water delivery volumes through metering. Using the District's SCADA system will ensure water conservation while conveying surface water supplies to the farmers. The District encourages the farmers to participate in irrigation scheduling using the CIMIS network for on-farm application of agricultural water.

b. How will you monitor your diversion to be sure you are within the limits of your water right and you are not wasting water?  Weir  Meter  Periodic sampling  Other (describe)  
Using ultrasonic doppler technology. The District will prevent flooding in high precipitation events by utilizing the SCADA system, monitoring the forecasted hydrologic conditions on Cache Creek, and coordinating operations accordingly.

**12. RIGHT OF ACCESS**

a. Does the applicant own all the land where the water will be diverted, transported and used?  
 YES  NO  
 If NO, I  do  do not have a recorded easement or written authorization allowing me access.

b. List the names and mailing addresses of all affected landowners and state what steps are being taken to obtain access:  
The District has easements that define its responsibilities for operations and maintenance of the canals.
