

**Table 4-1. Responses to Comments**

Ltr#	Cmt#	Comment	Response
2500	1	Our water is being controlled by those who have no clue of the disaster they are creating. This is a disturbing example of government over-reach and regulations that dis-regard the human existence.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2501	1	Water is life. Stop sending it out of our communities.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2502	1	The water board should be held accountable to the publics wishes/demands.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2503	1	We need a more comprehensive water plan for the whole state.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2504	1	I'm a fourth generation farmer. That has paid for the ranch in full hoping to save it for my grandsons.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2505	1	Actions being taken by the State Water Resources Control Board is nothing more than a political manipulation to choose winners and losers within the state.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2506	1	Why have restrictions on residential water use in San Diego been loosened? We're fed up with political drought! The transfer to southern CA are accommodation of foolish environmental policies.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2507	1	Stop sending our water away! It's not extra, we need it here!!!! Our aquifers will suffer.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2508	1	Stop giving our water to LA	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2509	1	We need our water, no transferring. Just read in the opinion column about CAVG4 that we have to pay \$30 per month for our meters, which is \$360 a year. Is that right? No other public utility makes you pay for meters just what the water you use costs.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2510	1	I do not agree with our government holding back water to our region. Too many lives depend on the crops and food grown locally and world wide. Farmers are encouraged to give up farming for solar farming. This is all a ploy from our government to force the solar farming. Their idea is to shut down the farms because they feel we can get our crops from out of country. I'd rather have American grown food!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2511	1	40% seems to be an awful lot to take away. Where is it going? Who does it benefit? The farmers and the population need the water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2512	1	Northern & Central California water should be utilized in those areas first!!! Water for people & Ag FIRST environmental concerns second!!!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2513	1	Time to respect and retain human life in California! Stop with the saving special animal and fish species... Water in California must be dedicated to Agriculture!! Anyone figure out how the beautiful produce in the grocery market get there???	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2514	1	Save our water. Our farmers need it.	Please see Master Response 1.1, General Comments for responses to comments that either make a general

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
			comment on the plan amendments or do not raise significant environmental issues.
2515	1	Our farmers need our water in the valley.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2515	2	LA needs to find a different solution to their problem.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2516	1	I want to add my opposing voice to the plan to divert water from Northern California rivers to Southern California  As I see it this will only set us up for continued drought in the state's and nation's most productive agricultural area.  Please stop this nonsense!! Let Southern California develop alternative ways to satiate their increasing demand for water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2517	1	Please protect the farmers and do not allow the State Water Board to take anymore water from our rivers. We need to band together to save agriculture.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2518	1	STOP ALL THIS NONSENSE. WHAT ARE PEOPLE GOING TO EAT? THIS WILL RUIN CALIFORNIA.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2519	1	I live in this valley and would like to continue to do so. I need my water to live and eat.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2520	1	This will be a killer for the State of California and feeding the world. . .	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2521	1	WE DON'T FARM, YOU DON'T EAT!!!! STOP BLAMING US FOR THE DEFICIENCY... THE FISH WILL SURVIVE UNTIL THIS GETS BACK TO NORMAL. THE FARMS AND PEIPLE WON'T... I CAN'T BELIEVE HOW STUPID OUR GOVERNMENT IS. NOT SURPRISED THOUGH... LOOK WHO OUR PRESIDENT IS...	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2522	1	keep our water for us not the rich who water yards every day and take from us, the poor	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2523	1	stop selling our water to the rich and over privileged	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2524	1	These effects will be devastating to our communities.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2525	1	L.A. doesn't need any more of our water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2526	1	Start building more water storage in the hills	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2527	1	Stop sending our water to the ocean. Follow the research, you're not helping the fish and you will devastate this area	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

**Table 4-1. Responses to Comments**

Ltr#	Cmt#	Comment	Response
2528	1	Protect the world's food source! Do not steal the SJ valley's farmers water source.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2529	1	Congratulations, Government has success in destroying 1 million acres of farmland and allied industries, and successfully working on another million. Did not improve any endangered species, or other fish. Did not create any jobs or any more revenue. Do not call yourselfs AMERICANS!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2530	1	People, jobs and growing crops are more important than the Delta smelt!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2531	1	Leave our water alone. It is private property. The state doesn't own it and has no right to regulate it.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2532	1	I'm a 4th generation farmer and we need this water to give my children the opportunity to become 5th generation farmers in Stanislaus County.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2533	1	I am so embarrassed by this government and this state. You are driving people away. My family has been here for many generations. Time to move!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2534	1	I'm sick of seeing our lakes dry because of politics.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2535	1	I BLAME OUR GOVERNMENT OFFICIALS... ALL YOU LIBERAL RATS THAT TAKE A PAYCHECK FROM HARD WORKING PEOPLE, ALL AWHILE YOU SIT ON YOUR HANDS AND DO NOTHING...BUT YOU IMPOSE MORE TAXES ON THE WORKING CLASS AND WE BARELY SQUEAK BY...AGAIN...YOU ALL SUCK!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2536	1	Please stop choosing the environment over the people of this great state.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2537	1	Taking our water will place a burden on our region when we have a drought.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2539	1	The mismanagement of CA needs to stop.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2540	1	Truth, no more lies about the true purpose of the water. Water thieves.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2541	1	Take your time. Reconsider the realistic impact.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2542	1	I am a grower in the Merced Irrigation District and this water is very important to me.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2543	1	I wouldn't have anything to drink by the time I'm in high school.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2544	1	Let the farmers have their water. Seriously, who cares about a fish?	Please see Master Response 1.1, General Comments for responses to comments that either make a general

**Table 4-1. Responses to Comments**

Ltr#	Cmt#	Comment	Response
			comment on the plan amendments or do not raise significant environmental issues.
2545	1	Moving water will ruin the Delta and the San Joaquin Valley. This plan is ill-advised because of the agricultural and thus food provision inadequacy it would create.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2546	1	I am signing this petition to request that the State Water Board and the Bay Delta Plan update and change their plan to include the needs of our whole Central Valley. 40% of our water? Do you realize no agriculture, no economy, no food, no jobs? Need to study all aspects not just the environmental interests and what Gov. Brown says.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2547	1	We don't need to divert water from northern CA to southern CA. We need to devise a way and conserve water in southern (end of comment).	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2548	1	Please don't take the water from our Central Valley and send it south. I understand many people down there didn't even reduce watering lawns because of the drought and the area up here depends on water for farming.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2549	1	Your plan is a death sentence to growers and ranchers! Is that what you want, to destroy farms, families' livelihoods, and the ag-based economy that has kept the valley alive?	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2550	1	Stop regulating the Central Valley of CA out of water. This is where the world's food is grown and prepared for market. Leave our water alone.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2551	1	I ate three nutritious meals today. Did you and your family? If so, thank a farmer.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2552	1	People need to eat! How are we supposed to grow crops without water?	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2552	2	Please quit flushing water out into the ocean to save a fish! People are much more important than fish!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2553	1	The Central Valley of CA is one of the most important food sources in the world. The San Francisco Bay area is a sensitive ecosystem fed by our rivers. Don't mess with Mother Nature! The consequences may turn out completely unintended. Don't do it!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2554	1	Give us our water back. We need water, not trains. If you haven't noticed, we are a welfare state and who on welfare can afford to buy tickets for your trains. Stop making companies leave due to taxation.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2555	1	We barely have enough money for our crops now, why would you want to give it away? We feed people.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2556	1	Why don't the millionaires in LA build a desalination plant instead of stealing our precious water that our families and farmers use.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2557	1	Don't send the valley's water supply out to sea at the expense of our local economy!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2558	1	As a Modesto resident, I have been diligent in conserving water. I did not do so to see it sold	Please see Master Response 1.1, General Comments for responses to comments that either make a general

**Table 4-1. Responses to Comments**

Ltr#	Cmt#	Comment	Response
		to the highest bidder or sent to southern CA!	comment on the plan amendments or do not raise significant environmental issues.
2559	1	Please get CA farmers more water not less. CA is the only place on Earth that can grow over 250 different commodities. We provide quality and affordable food and you cannot rely on anyone else to do that. CA's financial stability depends on us. We all need more water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2560	1	Our crops have been severely affected by the water issues already at hand. We cannot make our water issues worse.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2561	1	What about the Central Valley, the heart of CA? We produce more produce than any other state in the nation. We have some of the major crops of the world. Do you intend to let the Central Valley of CA turn into a dust bowl? Please stop all the diversions and find other alternatives. Just think of all the people that live in central CA.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2562	1	Don't take water from the valley. What about the people here in central CA who have wells that are drying up? The cities that have to truck in water already because of the drought. Would you take water from the farmers that feed America, there are other things that could be done. Think about the people that live here. Please don't take our water from the valley and foothills of CA. If you look at the amount of dead and dying plants and trees around the valley and foothills, you would never want to do this. Stop this and save the valley from drying up [end of comment on page].	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2564	1	We can't survive with what we have, it spells financial and ecological ruin for the county.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2565	1	Our waterways must be protected for future generations. The beauty and integrity of our nation-state must remain intact.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2566	1	Decisions concerning our water need to be made by the people of this state.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2567	1	Don't take our water, wells are going dry left and right. I just had to dig a new well, \$13,000. Build more dams.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2568	1	Instead of stealing water from farmers, develop a better and faster way to desalinate.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2569	1	Keep the water in our valley. We have a lot of agriculture here so we need it to grow food.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2570	1	Please get a clue! Perfect habitat for predatory fish.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2570	2	Non-stop flow, killing farmers, killing jobs, killing salmon.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2571	1	Please try to use common sense and fairness in the decision-making process. We all are citizens and need to share that water resource we have.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2572	1	Myself and many other good, law-abiding citizens of Merced and Stanislaus Counties are sick and tired of being the sacrificial lambs in giving up our rights to the water we deserve to	Please see Master Response 1.1, General Comments for responses to comments that either make a general

**Table 4-1. Responses to Comments**

Ltr#	Cmt#	Comment	Response
		grow the food that feeds our state and our nation.	comment on the plan amendments or do not raise significant environmental issues.
2572	2	We are fed up with Los Angeles County and other southern CA counties using our water and often times for frivolous purposes. This must stop!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2572	3	We cannot be the major source for water (40% more). Others in our state and our nation must make greater sacrifices.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2573	1	Anyone that has a pool should have to pay triple the water in summertime. These people act like we don't have a water shortage or something.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2574	1	Enough of this Water-Fix crap! Jerry does not have the right to destroy the ecosystem of all to continue his father's legacy! We must stop the insanity of using every drop of water for huge corporate farms. Save California, stop the tunnels! The mindset of "every drop that makes it to the sea is a wasted drop" has to end.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2575	1	Without water our farmers and ranchers cannot grow food or support livestock. Stop trying to save a little fish at the expense of our food supply. Grow a brain. A small fish or a world supply of food. It's not that hard to figure out.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2576	1	We are struggling enough with the amount of water that we have received. Please don't take what we need.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2577	1	Let's take into account all factors in making decisions, the human factor as well as the environment. The environmental damage that will be done in the SJ Valley when water is withheld will be farther reaching than that to fish. Air quality will decrease as the SJ Valley becomes as dust bowl with increased cases of asthma and Valley Fever. Also, what effect will it have on land-based animals.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2578	1	I've been a resident of Modesto since 2003 and am very concerned about big money stealing the valley's most valuable resource!.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2579	1	If this is truly about fish populations then there are other ways to improve our fisheries without destroying our communities and the importance of what CA agriculture provides the United States of America.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2580	1	Where is the science? If it's truly about fish populations there there are means in approving all stakeholders' concerns.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2581	1	Stop sending half our state's water to the ocean. You are killing our state's agricultural and our country's food supply for bad science!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2582	1	Please don't destroy our economy by taking our water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2582	2	I realize that the south state water users have much more money to spend on lobbying than we do but we should at least be part of the decision-making process. Why not send less water south? I recall reading about the City of Glendale, CA, sending water users a letter that they would be fined if their grass turned brown at the same time that Gov. Brown was ordering fines for overwatering. New Melones Reservoir is a disaster and I can see Don	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

**Table 4-1. Responses to Comments**

Ltr#	Cmt#	Comment	Response
		Pedro looking the same. Why would you sell us down the river?	
2583	1	We need to leave our reservoir alone and allow time for our valley to heal.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2584	1	LA needs a desalination facility and to build more dams to collect their floodwater. They need to learn how to save and recycle water, especially in their households and offices.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2585	1	They are really starting to overreach in every aspect of our lives.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2586	1	I have personally watched as our reservoirs recovered and filled back up over the winter with a Godsend of rain...and now I'm watching them drain like bathtubs, as it gets robbed from our farmlands to make SoCal lawns green and fill their swimming pools! How about instead of sending the valley into a tailspin of drought, they focus their efforts on desalination, since they have the entire Pacific Ocean to pull from?	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2587	1	Get real!!! The wildlife is not your priority, the twin tunnels are!!! Never...	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2588	1	We need water in the Central Valley. Please put someone capable in charge of valley water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2589	1	Stop imposing such tight restrictions on the Central Valley. Make the regulations the same statewide. California is in a drought but I know the restrictions are not the same throughout this state.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2589	2	The lakes that surround the Central Valley are so low, let them refill. Start saving water from rain and runoff during the wet season in rain barrels and start long-term water conservation and saving.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2590	1	The mismanagement of our waterways has already dealt detrimental blows to our economy. Address the bigger problems.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2591	1	We must save our Delta! The water conservation, stop farming the southern valley wastelands. Conservation will make up the difference.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2591	2	Please stop the tunnels.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2592	1	We need more water storage before we start selling the water to southern California.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2593	1	This is mostly farm country. We need the water here in northern California!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2593	2	We have dealt with years of drought and putting up with the libs dumping water down the rivers to try to flush fish down the river and now have problems with the trout population suffering due to this false belief that fish don't swim upstream. Read a damn book and learn something libs!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

**Table 4-1. Responses to Comments**

Ltr#	Cmt#	Comment	Response
2594	1	I'm a small business owner whose livelihood depends on agriculture. If the state continues to drive agriculture out of our state, I will be forced to move my business to a state that cares about the needs and concerns of their residents rather than the environmental attorneys and politicians.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2595	1	This is absolutely crazy! We feed 1/3 of the world and they want to send us 40% water? What idiots we have running this. We need water. We purposely let our huge backyard burn up and watered the front 2 days a week so it might look decent.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2596	1	My backyard backs up to the Tuolumne River, there is 6 inches of water along my section, this is a lot of water considering the sandbars we usually have. Where is your concern for the native fish and wildlife that depends on this water? Tell who has won when nothing remains.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2597	1	Keep our water here for agriculture. Feeding people.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2598	1	Stop destroying our farmland. You are destroying the farmer.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2599	1	Repeat of Owens Valley water grab.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2599	2	Do we really want to kill Central Valley's ag and be dependent on foreign countries for our food?	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
