University of the Pacific (1999-2000)

Research Assistant to Professor Gary Litton (1999-2000; supporting scientific research
for the Stockton Ship Channel Low Dissolved Oxygen Total Maximum Daily Load)

EXPERIENCE

As the Water Resources Coordinator for San Joaquin County, Mr. Nakagawa is responsible for making recommendations to the Public Works Director who reports directly to the Board of Supervisors on matters relating to water, storm water and groundwater resources, and flood protection. His work encompasses, without limitation, water management, water quality, water

education, water-related outreach, hydrology, hydrogeology, the Sacramento-San Joaquin Delta (Delta), and other topics directly or indirectly related to water (e.g., local and regional economics, agricultural viability, land use planning, development, invasive species management, levees, coalition building, historical preservation, etc.).

Mr. Nakagawa's duties and responsibilities include direct oversight and/or direct involvement in a number of programs, divisions, budget units and initiatives for the San Joaquin County Department of Public Works. He is the division head for the San Joaquin County Public Works Water Resources Division, which is directly responsible for the management of the following budget units: San Joaquin County Flood Control and Water Conservation District - Water Resources; Water Investigation Zone No. 2; Mokelumne River and Water Power Authority; Delta Activities; Eastern San Joaquin County Groundwater Basin Authority; and the County Service Area 54 Stormwater Water Pollution Prevention Program.

Throughout his career at the San Joaquin County Department of Public Works, he has prepared technical documents, studies, environmental documentation, reports and engineering plans and specifications, and numerical groundwater and surface water models. He has also directed and supervised staff and consultants in the preparation, use, and reporting of the same items.

Mr. Nakagawa has prepared text, figures, and graphics for the following groundwater-related documents, among others:

2004 - Eastern San Joaquin County Groundwater Management Plan

2007 – Eastern San Joaquin County Integrated Regional Water Management Plan

2008 – San Joaquin County Flood Control and Water Conservation District 1999-2007 Groundwater Report

2014 – Eastern San Joaquin County Integrated Regional Water Management Plan 2014 Update
