

[SUMMARY OF FINAL SUBMITTED VERSION]

PROGRESS REPORT BY PERMITTEE FOR 2015

Primary Owner: U.S. BUREAU OF RECLAMATION
Primary Contact: U.S. BUREAU OF RECLAMATION

Date Submitted: 06/30/2016

Application Number: A005628
Permit Number: 011967

Source(s) of Water	POD Parcel Number	County
TRINITY RIVER		Trinity
TRINITY RIVER		Contra Costa
TRINITY RIVER		Contra Costa
OLD RIVER		Contra Costa
TRINITY RIVER		Trinity

MAX Direct Diversion Rate: 2500 CFS
MAX Collection to Storage: 1540000 AC-FT
Face Value: 3349943.8 AC-FT

Permitted Use(s)	Acres	Direct Diversion Season	Storage Season
Other	0	01/01 to 12/31	01/01 to 12/31
Domestic	0	01/01 to 12/31	01/01 to 12/31
Irrigation	999999.9	01/01 to 12/31	01/01 to 12/31
Industrial	0	01/01 to 12/31	01/01 to 12/31
Municipal	0	01/01 to 12/31	01/01 to 12/31

1. Permit Review	
I have reviewed my water right permit	Yes

2. Compliance with Permit Terms and Conditions	
I am complying with all terms and conditions	Yes
Description of noncompliance with terms and conditions	

3. Changes to the Project	
Intake location has been changed	
Description of intake location changes	
Type of use has changed	
Description of type of use changes	
Place of use has changed	
Description of place of use changes	
Other changes	
Description of other changes	

4-6. Permitted Project Status	
Project Status	Not Complete
6a. Construction work has commenced	Yes
6b. Construction is completed	Yes
6c. Beneficial uses of water has commenced	Yes

6d. Project will be completed within the time period specified in the permit	No
6e. Explanation of work remaining to be done	Petition filed to extend time to put water to beneficial use.
6f. Estimated date of completion	12/31/2030

7. Purpose of Use	
Domestic	incidental
Irrigation	1654610 Acres Mixed Crop Types
Industrial	mixed
Municipal	0
Recreational	Recreational activities at Claire Engle Lake
Stockwatering	incidental
Fish and Wildlife Protection and/or Enhancement	Trinity, Clear Creek, Sacramento Rivers, Sacramento-San Joaquin Delta
Other	water quality

8. Amount of Water Diverted and Used			
Month	Amount directly diverted (Acre-Feet)	Amount diverted or collected to storage (Acre-Feet)	Amount used (Acre-Feet)
January	2331	58564	3312
February	1851	273471	11844
March	3669	44208	6219
April	1019	25451	1019
May	0	0	1982
June	935	0	22506
July	0	0	19892
August	0	0	23109
September	0	0	61046
October	0	0	30231
November	0	0	5645
December	2258	29011	12687
Total	12063	430705	199492
Type of Diversion	Both Direct Diversion and Diversion to Storage		
Comments			

Water Transfers	
8e. Water transfered	Yes
8f. Quantity transfered (Acre-Feet)	234
8g. Dates which transfer occurred	8/4 to 8/30
8h. Transfer approved by	SWRCB

Water Supply Contracts	
8i. Water supply contract	No
8j. Contract with	
8k. Other provider	
8l. Contract number	
8m. Source from which contract water was diverted	

8n. Point of diversion same as identified water right	
8o. Amount (Acre-Feet) authorized to divert under this contract	
8p. Amount (Acre-Feet) authorized to be diverted in 2015	
8q. Amount (Acre-Feet) projected for 2016	
8r. Exchange or settlement of prior rights	
8s. All monthly reported diversion claimed under the prior rights	
8t. Amount (Acre-Feet) of reported diversion solely under contract	

9. Maximum Rate of Diversion for each Month	
Month	Maximum Rate of Diversion (CFS)
January	3065
February	25546
March	2349
April	785
May	0
June	16
July	0
August	0
September	0
October	0
November	0
December	4222

10. Storage					
Reservoir name	Spilled this year	Feet below spillway at maximum storage	Completely emptied	Feet below spillway at minimum storage	Method used to measure water level
Claire Engle Lake	No	93.64	No	190.86	staff gauge reading

Conservation of Water	
11. Are you now employing water conservation efforts?	Yes
Description of water conservation efforts	Reclamation encourages water conservation through financial assistance.
12. Amount of water conserved	

Water Quality and Wastewater Reclamation	
13. During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?	No
14. Amount of reclaimed, desalinated, or polluted water used	

Conjunctive Use of Groundwater and Surface Water	
15. During the period covered by this Report, were you using groundwater in lieu of available surface water authorized under your permit?	No
16. Amounts of groundwater used	

Additional Remarks
Due to length, remarks are attached.

LEGEND: na = not applicable; nr = not reported; ua = unavailable

1/ Does not include water quantities and acreage for either American River Division or Black Butte Unit.

2/ Releases made through power generation facilities. Though these releases are totaled, the same water may pass through multiple facilities.

3/ As appropriate value is shown only for regulating reservoir; Includes river outlet releases for downstream uses and/or flood control releases, including temperature control, water quality and Delta standards.

4/ M & I use by Clear Creek Community Service District.

5/ Total delivery under water right settlement contracts; includes water under contractors water rights.

6/ Includes water under water service and water right settlement contracts; some of this water includes water under contractors water rights.

7/ The total amount of acres irrigated is unavailable.

8/ River release is made at Goodwin Dam.

9/ Water service contract and water right settlement deliveries are made at Goodwin Dam.

10/ Does not include acreage of Banta-Carbona ID, Byron-Behtany ID, and Patterson ID, as numbers were not available in time.

11/ Joint State/Federal use facility.

12/ The total amount of Reservoir Evaporation is unavailable.

13/ Does not include acreage of Pacheco WD and Panoche WD, as numbers were not available in time.

- 14/ Does not include acreage of San Benito County WD, as numbers were not available in time.
- 15/ All contractors including water right settlement contractors except Exchange Contractors below
- 16/ Water diverted directly from San Joaquin River is under water rights of settlement contractors.
- 17/ Does not include irrigated acreage in Coelho Family Trust, Dudley & Indart, James ID, Meyers Farms Family Trust, and Reclamation District 1606.
- 18/ Amount reported under deliveries for San Luis Canal.
- 19/ Represents the combined irrigation diversions and acres irrigated of Central California Irrigation District, Columbia Canal Co., Firebaugh Canal Co., and San Luis Canal Co. Irrigated acres do not include Central California ID and Firebaugh Canal WD, as numbers were not available in time.
- 20/ Generation facilities at Friant Dam and associated water rights are not operated or held by Reclamation.
- 21/ Releases include water for water right Settlement Contracts between Friant and Gravelly Ford.
- 22/ Total area in water right settlement contracts.
- 23/ Does not include acreage of Arvin-Edison WD, Garfield WD, Hills Valley ID, International ID, Karweah Delta WCD, Kern-Tulare WD, Lower Tule River ID, Porterville ID, Stone Corral ID, Tri-Valley WD and Tulare ID, as numbers were not available in time.
- 24/ Madera canal acreages were not available in time.

2015 Progress Report for A005628

Remarks:

All data is preliminary and subject to change.

Operations are integrated within the Central Valley Project (CVP) and also coordinated with the Department of Water Resources (DWR) consistent with the provisions of the Coordinated Operations Agreement (COA) dated November 24, 1986. 2015 was a critically dry year based on the water year classification and the continuing drought conditions presented significant operational challenges. Throughout 2015, Reclamation worked closely with DWR, the SWRCB, the National Marine Fisheries Service, U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife, and used the operational flexibility of the coordinated operations of the CVP and State Water Project (SWP) to minimize the effects of the severe drought on water supply, fisheries resources and the Delta. Interagency coordination included frequent meetings of the Real-Time Drought Operations Management Team (RTDOT). Reclamation and DWR developed a Drought Contingency Plan (DCP) which was provided to the SWRCB. The CVP and SWP operated under a Temporary Urgency Change Order during significant portions of 2015.

Part 2: CVP water rights permit terms and conditions are specified in D1641. Due to the historically dry conditions, the Governor declared a state of emergency on January 17, 2014 and issued subsequent proclamations and executive orders throughout the drought to address critical issues related to the historic drought. Project Delta operations were very challenging due to the continuing drought conditions and low reservoir storage. Reclamation and DWR jointly filed a Temporary Urgency Change Petition (TUCP) on January 23, 2015 to temporarily modify some of the requirements in D1641 including Delta Outflow, Delta Cross Channel Gate operations, Minimum San Joaquin River Flow and export limits. The changes were necessary to preserve upstream storage to aid in meeting temperature, instream flow and salinity requirements later in the year and to ensure delivery of minimum health and safety supplies to municipalities served by the CVP. The SWRCB issued an order approving the TUCP on February 3, 2015. Reclamation and DWR filed subsequent requests for changes to additional D-1641 criteria including the Western Delta compliance location, Rio Vista flows, further changes to the San Joaquin River minimum flows and flexibility in the export limits. The order was subsequently modified by the SWRCB as necessary to adapt to the unique conditions presented by the drought. The TUC remained in effect through the end of 2015. The joint petitions, SWRCB orders and supporting information including the DCP and correspondence with the fisheries agencies can be viewed at http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/tucp/ Reclamation and DWR also filed a joint petition for change to consolidate the CVP and SWP places of use downstream of the Jones and Banks pumping plants in order to facilitate exchanges between CVP and SWP south of Delta contractors (CPOU). The SWRCB issued an order approving the petition on April 27, 2015. The water exchanged under that order has reported to the Board separately as required by the order approving the CPOU. Reclamation operations throughout 2015 were consistent with the provisions of D-1641 (as modified by the TUCP), the BiOps, the COA and the CPOU.

Part 4: Amount used is consumptive use only (withdrawal and direct diversion). Includes withdrawals from water restored in San Luis under this Permit. Transfer was from Contra Costa Water District to BBID (previously stored LV water through an exchange with CVP diversions).

Part 5: Rate of Diversion is the maximum rate of diversion to storage + direct diversion. Direct diversion rates are the average daily rate of monthly diversions (since only monthly data was available to preparer).

Part 7: Reclamation does not collect annual data on water conservation, reclamation, or conjunctive use.

CVP Summary Attached.
