

August 2, 2017

Mrs. Suzanne Womack
Clifton Court, LP
3619 Land Park Drive
Sacramento, California 95818

Dear Mrs. Womack:

This letter is in response our meeting on June 27, 2017 regarding our adjacent properties at Clifton Court Forebay, and your drainage system.

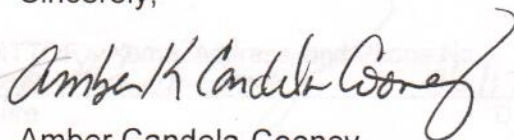

Based on our discussions, the Department of Water Resources (DWR) would like to issue you a Temporary Entry Permit (TEP), which would allow you and/or your representative access to DWR owned property to replace/repair the siphon breakers as well as perform maintenance on the leaking pipes that drains your tail water into Clifton Court Forebay.

Please keep in mind that this TEP will be issued on a one time basis for the work activities stated above for the visible above-ground pipeline, and at no time will you be permitted to perform any digging or make any alterations to DWR's levee system. In order for the process to begin, you will be required to submit a plan to the Delta Field Division for review describing the nature of the repair/replacement, type of equipment to be used, anticipated hours of operation, and a schedule/timeline of completion. Also, you and your tenant will be financially responsible for all costs associated with the repairs. A Delta Field Division staff member is required to be present on-site during the period any work on DWR property is performed.

This letter is being sent via certified mail as well as through standard mail delivery to both you and your lessee. It will require both party signatures for the entry permit to be valid.

If you have any questions, please call me at (209) 833-2095.

Sincerely,

Amber Candela-Cooney
Utility Crafts Superintendent
