

Table 1 summarizes the total SIP-creditable incentive-based emission reductions generated through incentive programs, expressed in tons per year and tons per day, claimed in the 2017 Annual Demonstration Report. The data also includes 70 District projects that were implemented during the timeframe covered under the 2016 report and 1097 NRCS Projects that were implemented during the timeframe covered under the 2013 – 2016 reports but were not included in that data set.
