

**Figure 5**

Total annual export (left axis) of water from the south delta by the pumps of the State Water Project (red) and federal Central Valley Project (blue) in million acre-feet. Gray bars show periods of drought, when pumping was reduced primarily because of low inflows. Total annual inflows of water to the delta in million acre-feet (right axis) are the open circles. Data from DAYFLOW ([www.water.ca.gov/dayflow](http://www.water.ca.gov/dayflow)).
