State of California State Water Resources Control Board

DIVISION OF WATER RIGHTS

1001 I Street, 14th Floor, Sacramento, CA 95814 P.O. Box 2000, Sacramento, CA 95812-2000

Info: (916) 341-5300, Fax: (916) 341-5431, www.waterboards.ca.gov/waterrights

INITIAL STATEMENT OF WATER DIVERSION AND USE NOTE: A Statement is not a Water Right

This Statement should be typewritten or legibly written in ink and submitted to the address above.

A separate statement must be filed for each point of diversion.

An (*) indicates a required section. Required sections must be completed for the Statement to be accepted.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed form the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to 1) store water for later use 2) divert water which originates in a different watershed 3) divert water released from storage, or 4) divert return flows from groundwater use.

An <u>appropriative right</u> is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission in December 1914, new appropriators have been required to obtain a permit or license from the State.

Statements of Water Diversion and Use must be filed by a riparian and/or pre-1914 appropriative water user. The filing of a statement 1) provides a record of water use, 2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and 3) assists the State in determining if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please visit the website http://www.waterboards.ca.gov/waterrights/water_issues/programs/diversion_use/, or write to this office.

Attachment to Initial Statement of Water Diversion and Use for Reclamation District 1004 Butte Creek Farms

- **D.** Related Water Rights: Permit 16771 (Application 23201)
- G. Quantities diverted at this point of diversion during the season authorized under Permit 16771 (Application 23201), April 1 through June 15 and September 1 through January 1, are reported on the 2009 Progress Report by Permittee for Permit 16771.
- J. Water diverted at this point of diversion was initially applied to approximately 486 acres within Butte Creek Farms. Tail water originating from this diversion is comingled with tail water from other points of diversion and sources available to the District and is re-circulated for use throughout the District's boundaries. The District is located just to the east of the Sacramento River, approximately 7 miles northeast of the town of Colusa in Glenn and Colusa Counties.
- **K.1.a.:** Optimum water conservation efforts have yet to be determined; however, these efforts are ongoing and include improved water management practices and technologies such as, but not limited to extensive recirculation system allowing for reuse of tailwater throughout the District, laser leveling of fields, varietal changes, and weed abatement.
