

**Delta Outflow as a Percentage of Unimpaired Flow
for Biological Assessment Proposed Action**

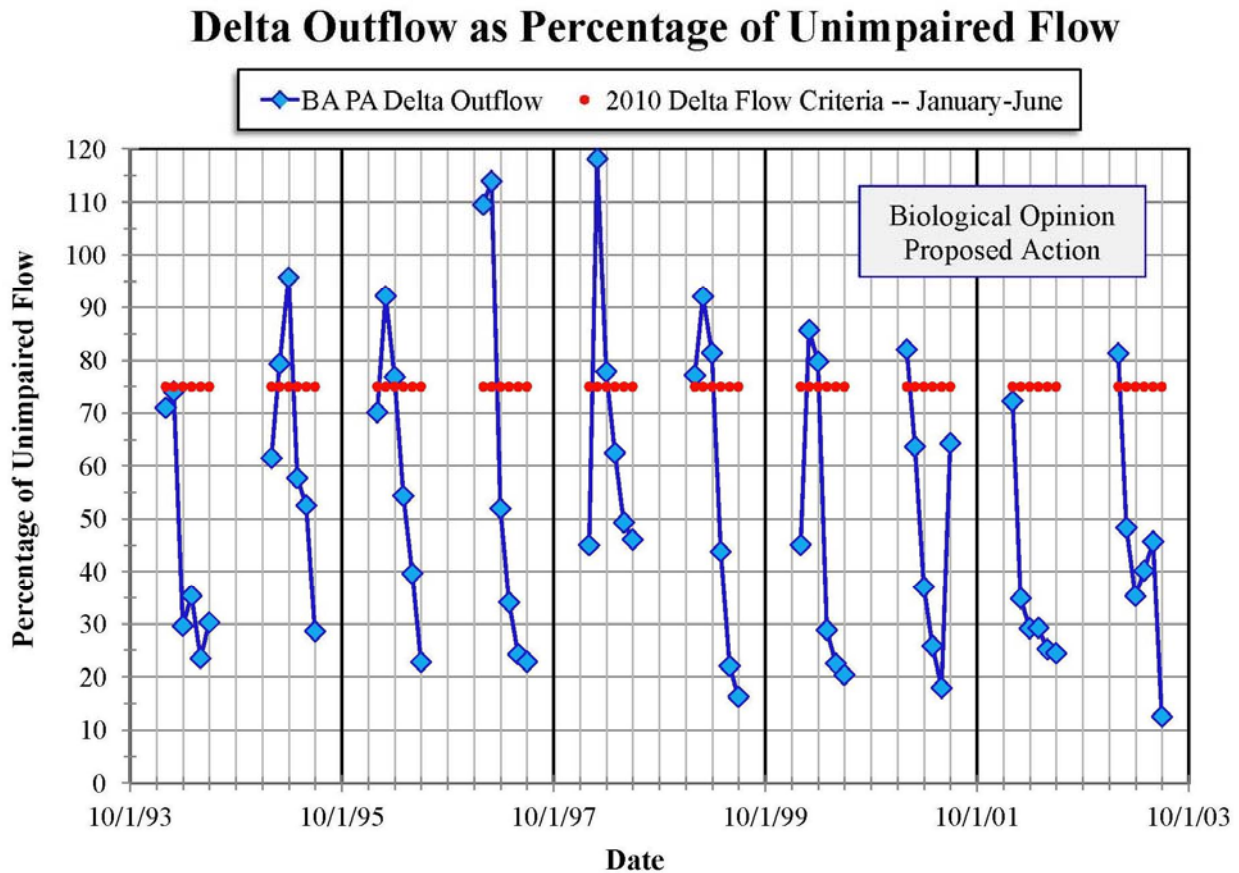

Figure 1: Simulated monthly-averaged Delta outflow as a percentage of unimpaired flow for the Biological Opinion Proposed Action for the period October 1993 through September 2003. Estimated historical unimpaired outflows are from DWR’s March 2006 draft report, “Estimates of Natural and Unimpaired Flows for the Central Valley of California: Water Years 1922-2014.” (CCC-SC-36).
