

**GRASSLAND WATER DISTRICT**  
**PROPOSED WATER-RIGHT TERMS AND CONDITIONS**

1. To prevent unreasonable injury to wildlife as a result of the operation of the California WaterFix project, the diversion or redirection of water under this permit shall comply with the requirement in section 3406(d)(1) of the Central Valley Project Improvement Act (CVPIA) for the delivery of firm water supplies of suitable quality to wetland habitat areas in the Central Valley of California.
2. Permittee may reduce deliveries of water to wetland habitat areas up to 25% due to hydrologic circumstances based on natural inflow to Shasta Lake during “Shasta critical” years. Reduced deliveries to wetland habitat areas shall not be imposed due to conveyance limitations in the Delta caused by the diversion or redirection of water to CVP water service or repayment contractors through the California WaterFix facilities.
3. Permittee shall provide CVP refuge contractors located south of the Delta an equitable opportunity to reschedule water in San Luis Reservoir.
