

SUMMARY OF QUALIFICATIONS

Steve Centerwall

POSITION: Principal – ICF International; Consultant Project Manager, BDCP/California WaterFix EIR/EIS

EDUCATION: B.S. in Environmental Policy and Planning, University of California at Davis, 1986

PROFESSIONAL EXPERIENCE:

2011 to Present: Project Manager, BDCP/California WaterFix EIR/EIS.

As project Manager for the overall BDCP/CWF EIR/EIS, developed the project description and approach to environmental analyses. Responsible for overall oversight, decision-making and delivery of successive versions of the EIR/EIS.

2002 to Present: Project Director/Project Manager, River Island Development Project.

Managed the EIS for development of River Island Development Project on Stewart Tract in the Delta.

1998 to 2005: Project Director/Project Manager, Battle Creek Salmon and Steelhead Restoration Project.

Prepared an EIS/EIR to restore portions of north and south Battle Creek to improve habitat conditions and reduce barriers for salmon and steelhead. Developed project description and alternatives and provided oversight for environmental impact analysis approach for resource chapters.

2000 to 2004: Project Director, South Delta Improvements Program EIR/EIS and Action Specific Implementation Plan.

Oversaw initial development of the EIR/EIS and associated technical analyses of south Delta export operations, water supply, fish and wildlife resources, and barrier construction and operation.

2006 to 2008: Project Director, Walker Basin Restoration EIS.

Provided management oversight and senior-level peer review of all EIS chapters supporting the Walker River Basin Restoration Program which aims to restore flows to Walker Lake for the benefit of native fish and wildlife

1995 -1996: Senior Environmental Planner, East Bay Watershed Master Plan Programmatic EIR.

Prepared chapters and coordinated project delivery of the Draft and Final EIR.
