

## **2010 Day flow Update/Correction**

**DWR (Chris Enright, Brad Tom, Kate Le)**

The Dayflow web site is [www.iep.water.ca.gov/dayflow](http://www.iep.water.ca.gov/dayflow). Since our last release in early January 2011, there have been updates to the Yolo Bypass flow and Georgiana Slough flows. To provide you with the latest flow changes, we have updated these flow changes. Also, in the current release, Byron Bethany Irrigation District pumping (BBID) is subtracted from Gross Channel Depletions (GCD). We intended to subtract BBID from GCD in the January 2011 release, but we forgot. As a result, QOUT, QCD, QWEST and QRIO changed slightly. Please visit the web site to download the latest WY2010 data set.
