Bay Delta Conservation Plan
CA

Dear Conservation Plan,

We cannot sacrifice the progress made in restoration of this area to keep aiding the agri-business that is farming a desert with wasteful methods.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Ms. Carol Dickason

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

This is beyond insane - and totally not in your character Gov Brown!

You have a history of making good decisions for the environment, and you are a spiritual man. If you meditate for 2 seconds on this - you know it is ludicrous! There is absolutely no reason for the Delta Water Tunnels, and they would destroy an ancient, natural water ecosystem that so many species - including humans, rely on for their survival. We know these human engineered projects only work to benefit one consumer: big ag. They have been tried in the past, and we end of doing expensive restoration projects (if they get done) 100 yrs down the line b/c of the devastation. Don't even think about it!!!!

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Destroy Westlands! That project never should have happened in the semi-arid Central Valley area. We should be growing crops suitable for a semi-arid area. Before it was cotton, which has no place in California. Almonds don't have any place in central California, either. Most growers in central California are out-of-state industrial ag owners, and we Californians are tired of wasting our water so avaricious out-of-state, avaricious corporate fat cats can make a profit, while California's environment is destroyed.

That water is Northern California water, and we need it for our Delta and for our Northern California fisheries!

NO TUNNELS! In this case, Brown obviously is owned by out of state Big Ag.

I am writing to express my strong opposition to the Delta Tunnels Plan.

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Why have you turned against our people and our state? You used to stand for something! Now you are like all the rest, show me the money!!!

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Ms. Sally Nelson

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

OUR delta, the people of Northern California 's delta needs YOUR protection. The delta's rich estuaries, it's ecology, have been under siege from greedy developers, water-starved farmers (both corporate and individuals) for years. Maybe, just maybe, there needs to be a mindful recognition that OUR state is OVERDEVELOPED in terms of its limitations. Especially during the recent drought, a harbinger of less rain and much less snow pack, responsible leaders MUST accept the "new normal" and include ALL life in their political decisions. Even your Jesuit Pontiff understands this concept!!!

I am writing to express my strong opposition to the Delta Tunnels Plan.

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Let's be realistic. The only way to maintain water is to conserve water - NOT to parasitize one part of the country/state for another part. Lets learn to live within our environment, not sacrifice the environment for the ultimate detriment of everyone.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Dr. Susan Stover
6310 Putah Creek Ln
Winters, CA 95694-9601

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Creating one disaster to help avert a different disaster is not a viable solution. The Delta area has already suffered numerous damaging attacks in the past with few restoration projects to correct the problems that continue to develop there. In this case more requires less.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Please don't let this project go through. The delta and California's rich waterways have been compromised for years already. Diverting more water in this way is not the answer to our problems. Let's find a solution that works for the north as well as the south. And find solutions to the problems of Central Valley agriculture, which go deeper than needing more water.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. CA

Dear Conservation Plan,

The carrying capacity of the tunnels is far beyond the finite supply of water available - this will lead to both inequality of this limited resource in addition to the destruction of the Delta ecosystem.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Dr. Kevin Grady

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Another technological fix on nature is not the way to go. To save water, to maximize the capture of water where it falls, we need to do it a steady, dependable, way as the Earth has built humus since the dawn of dirt. Allan Savory's Holistic Management, Joel Salatin's farming methods, the films "Soil Carbon Cowboys" and "Back to Eden" and more describe the rapid building of humus via imitations of nature. Humus is the home of organisms and the sponge that traps water where it lands. that Earth's structure came about via nature. To destroy what has occurred over eons of time in favor of a temporary, damaging, fix is just wrong!

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Let the fish and wildlife live. Let them be! Can you see the problem is not water - it is too many people using what we have: More every day!

The true and only solution is a declining human population, not more farmland, endangered wildlife or tunnels designed to rearrange nature.

Please Stop tinkering and scheming, Please . . .

James Woods

Bay Delta Conservation Plan
CA

Dear Conservation Plan,

Big Ag wastes a tremendous amount water. Instead, we need to produce Agriculture sustainably and Organically! UC Davis has demonstrated that organic food can produce just as much food as conventional but with tremendous sustainable benefits. We are in this water crisis because of the waste and abuse of water by Big Ag, Big oil. Currently, aquifers are being used as dumping grounds for toxic fracking waste.

This is ultimate abuse of our limited resources. Crises occur because of greed and unfortunately Californians are suffering from corporate abuse. We need Smart Organic Farming not continuing down the destructive conventional big Ag abuse. There is no excuse but just plain greed as science has demonstrated in order to feed the world we Must grow sustainable Organic Food. As for energy, we have enough energy in the sky for the next 5 billion years. In one hour the sun hits planet earth enough energy is produced for everyone on the planet for an entire year. There is another unlimited energy source which is producing gas in the UK. A plant which cost a mere 18 million dollars(the price of a house in California) is able to produce energy for 2 million people via conversion of human waste into Biomethane. Cities could produce their own sustainable energy by utilizing their sewage plants. Ideally, we could utilize sewage waste to provide energy to generators to operate solar energy 24/7, on demand, for everyone.

Vehicles should be electric with use of solar and wind (resistance) which is unlimited when driving. Solution are available and highly profitable, we just need greed to work in a positive direction which provides benefit instead of destruction. Get Greedy with Roof Top Solar Energy! Get Greedy with Organic Food Production. It's a no brainer, the Market demonstrate consumer demand with trillions just waiting for the taking. Get Greedy with Roof Top Solar Energy! Get Greedy with sustainable Organic Food Production!

I am writing to express my strong opposition to the Delta Tunnels Plan.
