Oct 8, 2015

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Instead, California needs to seriously consider massive water desalination plants in order to increase fresh water supplies.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mr. Daniel Soong  
6702 Paseo Catalina  
Pleasanton, CA 94566-8617

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

It's time for California to stop trying to use 20th century solutions to solve 21st century problems. There is no guarantee that the tunnels will be able to provide sufficient water to southern California given climate change patterns. But we do know that that the tunnels stand a good chance of harming a delicately balanced ecosystem in the delta. It's time to start looking at desalinization and other solutions that can be targeted to the specific location.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

**Subject:** Twin Tunnels

My purpose in writing this communication is to **VEHEMENTLY** oppose the construction of the twin tunnels designed to divert water from the rivers that supply the Delta area.

I have been a resident of Stockton for forty two years now and have come to realize the vital importance of the agricultural and environmental needs supplied by the water from the Sacramento, American, Mokelumne, San Joaquin, Calaveras and other rivers that enter into the Delta region of Northern California.

My childhood and early adult years were spent in the Los Angeles area. While I realize that the larger number of people live in Southern California compared to Northern California I feel that diverting the water supply from Northern California to the Southern part of the state is not the right answer to the problem of supplying Southern California. This plan would irreversibly harm the agriculture of our area which supplies a large portion of food products for the entire nation.

Southern California needs to conserve water as much as possible instead of watering golf courses, millions of swimming pools and lawns and wasting water. I have seen water flowing in the concrete "flood basins" of the Los Angeles River even during summer months.

Please consider other alternatives to the twin tunnel project.

Sincerely Edward Schneider M.D.

**Subject:** FW: Major problems with WaterFix proposal

**From:** Richard Denton [<mailto:rdenton06@comcast.net>]  
**Sent:** Thursday, October 08, 2015 10:09 AM  
**To:** Laird, John@CNRA; CNRA Office of the Secretary  
**Cc:** Nemeth, Karla@CNRA; Cowin, Mark@DWR; Bonham, Chuck@Wildlife  
**Subject:** Major problems with WaterFix proposal

Dear Secretary Laird,

In your October 6, 2015 reply to the Congressional Representatives, you declined to extend the comment period for review of the Cal. WaterFix environmental document.

I ask instead that please you give serious consideration to immediately withdrawing the Cal. WaterFix RDEIR/SDEIS as well as the petition to the SWRCB and Clean Water Act applications.

The current California WaterFix proposal will not contribute to achieving the coequal goals or solving the serious and urgent problems of the Delta ecosystem and California's water supply reliability. Worse still WaterFix will actually hinder achievement of these coequal goals.

Allowing the export contractors to pay for the BDCP and WaterFix planning efforts has meant that a project of California-wide and national importance has only focused on what are essentially only two alternatives that would only benefit export water quality and fails to even increase export water supplies.

Because the export contractors control spending on the environmental review process, and the existing budget was pretty much spent, the RDEIR/SDEIS was released with no new modeling and only brief sensitivity analyses. As a result, the RDEIR/SDEIS is inadequate for use by decision makers such as the SWRCB, U.S. Army Corps or even the lead agencies. The Delta ISB in its latest comments on the RDEIR/SDEIS found that presentation of the impact analyses is also inadequate and hides actual impacts from decision makers. This is not what the Natural Resources Agency should be helping to support and rush through.

It is important that you, as a key decision maker, understand the serious problems with the current WaterFix proposal and the model analyses and environmental documents that were supposed to support that proposal.

A detailed analysis of the flawed RDEIR/SDEIS modeling data indicates that the project would actually increase exports during the driest months when Delta outflows are very low and the Delta ecosystem is most stressed. The modeling data also indicates that the Army Corps limits on inflows to Clifton Court would be regularly exceeded. The RDEIR/SDEIS and the Army Corps application make no mention of this. Reverse flows in the south Delta are not minimized as the public outreach claims and remain significantly reversed (OMR < -2,000 cfs) 55% of the time. The water quality impact analyses for the RDEIR/SDEIS were unexplainably performed for late long term (2060) conditions rather than early long term (2025). As a result, the greater amount of seawater intrusion (at 2060) masks the actual WaterFix impacts on water quality.

The flawed "brief sensitivity analyses" done to support the RDEIR/SDEIS still show a strong dependence on exports from the south Delta, despite the construction of very expensive new intakes in the north Delta. Strangely, a recently posted WaterFix animation proudly states that most of the exports during dry years will be from the south Delta, i.e., when the Delta is most stressed.

There are many other problems with the RDEIR/SDEIS and too much time will be wasted if you wait till the end of the comment period, and review of yet another round of comment letters, before realizing that WaterFix is way off track.

The 2009 Delta Reform Act requires that the SWRCB develop new Delta flow criteria before BDCP can be approved. Strong legal arguments in support of this statutory requirement are laid out in the September 29 letter from NRDC et al. to Tom Howard. BDCP Alternative 8 and WaterFix Alternative 4H3 demonstrate that the preferred alternative infrastructure will not be viable with these necessary increased flow requirements. Once the SWRCB sets new flow requirements, the north Delta intakes and twin tunnels would become a very expensive stranded asset.

The Natural Resources Agency and DWR must reclaim their leadership role and responsibility to protect Delta water resources and the Delta ecosystem. As outlined in the California Water Action Plan, there are more viable alternatives that need to be considered that incorporate new storage and conveyance to capture and store water during periods of high Delta flow, allow increased Delta flows in all months for fish, as well as actions to reduce water demand and increase local water supply reliability. These alternatives must be given serious consideration, and as soon as possible.

The WaterFix proposal would harm rather than improve the Delta ecosystem and fails to provide any significant increase in water supply reliability. Contrary to State and Federal statutes (2009 Delta Reform Act, Public Law 112-74), it fails to contribute to achieving either of the coequal goals.

The situation in the Delta ecosystem is dire and an effective sustainable solution is needed now. As Interior Deputy Secretary, Michael Connor, said in the September 30 press release regarding the new report on "Challenges facing the Sacramento-San Joaquin Delta," we must adopt bold, new approaches and any necessary water infrastructure improvements should be accompanied by a portfolio of actions such as water conservation and efficiency measures, habitat improvements, and improved groundwater management and storage.

Just because the BDCP proponents have spent \$250 million on the BDCP and WaterFix planning and environmental documents, and have "put a million hours into it" (Governor Brown, May 6, 2015), does not mean that WaterFix has not gone seriously off track. The last nine years have been largely wasted, with no meaningful stakeholder participation since 2010. It is not too late to do the right thing.

It is time to acknowledge "*the emperor has no clothes*," and invite wide-spread stakeholder involvement in developing a real solution, one that actually achieves both coequal goals. No one wants the Delta smelt or any other of the key fish species to go extinct on their watch.

Detailed graphs of the WaterFix sensitivity analysis data and other useful documents that highlight serious problems with the WaterFix proposal can be found on the SWRCB WaterFix petition page [http://www.waterboards.ca.gov/waterrights/water\\_issues/programs/bay\\_delta/california\\_waterfix/early\\_petition\\_comments/](http://www.waterboards.ca.gov/waterrights/water_issues/programs/bay_delta/california_waterfix/early_petition_comments/)

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

While it is unfortunate that much of central and southern California have been developed as urban and agricultural centers without adequate sources of water, diverting water from northern California is not a solution.

Experts on climate change are projecting that snow packs in the Sierra will be substantially reduced in the future due to climate change.

Northern California is suffering a serious drought. Current water laws require that water be diverted to southern parts of the state irrespective of fluctuations in water supply (rain and snow pack). The proposed tunnel project will further drain northern California of its water.

The Bay-Delta is an irreplaceable resource which will suffer additional damage should the tunnels be built.

This drought year (2015) has already taken a serious toll on fish species and other aquatic plants and animals, and the tunnels will only do further damage. Please do not approve the Delta tunnel project.

It's time to eliminate water hungry landscapes and agriculture in the southern regions of the state which do not have the snow pack or rainfall to sustain them.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Governor Brown has sold out Northern California to corporate farmers, greedy rapers of the earth's underground natural water systems, and the heavily rural fire protection agencies.

More Norther water for pesticide GMO monster motivated companies. No regulation on ancient natural aquifers being totally drained [even in bountiful rain years] to avoid paying for water his father sent south; causing their collapse, never to be an active emergency source of water again. Making rural property owners to pay a fee [\$150], which goes to administration instead of firefighters fighting fires. Jerry you sold us all out big time.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Leave the Delta alone. The shortest path between two points in California is the one that does not destroy precious things.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mr. Eric Dynamic  
PO Box 30782  
Oakland, CA 94604-6882

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

For me, it is very important for the Delta Tunnels Decisionmakers to take a deep breathe and look at the extreme ramifications and consequences the Tunnels will cause. Please sit down, remove all of your political aspirations from your thoughts, and see just how much damage the Tunnels will cause in NorCal.

Among many of the obvious reasons already discussed to oppose the Tunnels, there is the lack of responsibility for SoCal to create other water sources. If 'healthier water' is the reason, SoCal needs to be responsible for their own growth and water needs and make plans for the answers that does not ruin NorCal people, farmers, environment, public health, and economics.

The loss of farm land, fish and game, and a total loss of food source (NorCal will be left with salt water) are among a small portion of the consequences.

This Tunnel projects ruins generations of family lives, jobs, etc. It is time SoCal works on solutions using SoCal resources. I strongly urge you to vote NO!

Thank you for listening,

Barbara McGowan

Resident, Grand Island, Walnut Grove, CA

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

It doesn't seem right to damage one region of God's creation to change another. People should learn to live in harmony with nature without harming others.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mrs. Laverne Uhte  
40 Camino Alto  
Mill Valley, CA 94941-2956

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

This new try to grab northern Calif. water for use by Big Agribusiness is pathetic. They tried to grab it before via the Peripheral Canal promoted by Jerry Brown so this is the same attempt headed by the same Jerry Brown. It is criminal that big money and population numbers can destroy a vital part of Calif. to benefit mainly out of Staters. Jill North

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

While it might seem like a good thing, taking more water up stream in the Delta will not only endanger the health of the bay but also the land down stream. Without the fresh water more salt water can move up the delta and destroy farmland. This isn't a good solution to our water problems.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Protecting the Delta and the San Francisco Bay downstream is critical to maintain the already threatened region's ecology and endangered species. The twin tunnels idea is just a drop in the bucket and diverts water to purposes that are not priority, nor should they be. This project has virtually no merit whatsoever and should not go forward. The money it would cost could well be better spent on a more viable solution to the state's water crisis.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

This project is a huge diversion from what California should really be doing about water -- learning how to do more with less, and the smart use of gray and recycled water. Industrial scale agriculture is not the wave of our future. If this project goes through, it will be more business as usual for big agriculture, to the detriment of our ecosystems.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mr. Ken McIntire  
235 Old Ranch Rd  
Redwood City, CA 94062-4576

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Taking water from the river in this way seems like a really bad idea. Destroying the natural flow and reducing the amount that passes through will have a huge and potentially negative effect on everything downstream. Perhaps it's better to rethink what kind of crops we can grow in our changing climate reality . Thank you

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

While I agree with the concept of an upriver water diversion point being more environmentally friendly than the current diversions in the south Delta, I would only support such a concept if the upstream diversion project provided sufficient GUARANTEED AND ENFORCEABLE freshwater flows through the Delta and into San Francisco Bay which would restore the Sacramento-San Joaquin Bay-Delta Estuary natural ecosystem to the maximum extent possible. Fish and wildlife habitat restoration must include freshwater flows in addition to improvements in habitat substrate and water quality. To mitigate for past damages to the ecosystem by water diversions, freshwater flows through the Delta must be increased above current levels. Implement the SWRCB's flow criteria for the Delta by creating enforceable flow standards and ecosystem health will improve. Continue to reduce water demand by encouraging water conservation and recycling. To help reduce water demand, discontinue encouraging further human population growth and new housing developments in California.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

THIS LITTLE STORY SHOULD HIT CLOSE TO HOME: The now desert landscape of China "Lake" (thanks to the human infestation's overuse of natural resources) still occasionally has a small puddle of water here and there in early Spring. One, among the petroglyphs, provides a precious limited water source for indigenous rodents. However, being rodents, they poop in the same water that is their limited resource, befouling it.

On a global scale, how different are we?

The drought is not the problem. The infestation of humans over the past several decades is the problem. The land has a limited environmental carrying capacity.

And we ARE an infestation. Actually the rodents are smarter. When resources are limited, they limit their population to the carrying capacity of the land.

Charles Darwin and Garrett Hardin had it right.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Decimating the Delta to feed the insatiable appetite for water in agriculture (and southern California, as well) is totally unacceptable.

We have failed to implement meaningful measures to ensure water-wise standards in water-hogging areas south of the Delta. I live in Marin County, which endured dire drought conditions in the mid-1970s. I practice water conservation in my home, keeping my personal usage far below the average for my area. I'm tired of seeing others use water in a prodigal manner while so many of us have struggled for decades to conserve. The Delta tunnel project is not a solution. It is enabling, pure and simple, allowing agriculture and other moneyed interests to do "business as usual" while failing to address the real problem beneath it all: California's water-dependent lifestyle is not sustainable. Stop the Delta tunnel project.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Our water needs to stay here for our farmers

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mr. Mark clark  
5204 Linda Lou Dr  
Carmichael, CA 95608-2179

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Our almond and pistachio consumption is one thing. Our addiction to meat and dairy a much more worrisome topic. All should be addressed.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

This isn't a "fix" it's a disaster! The taxpayers won't pay for what amounts to a water heist.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Most almonds are exported from Calif. We need our own water for our own state and citizens. We do not want corporations taking our water to enrich themselves!

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Water catchment works better than throwing more money into corporations pockets. It is an ancient method that has worked for centuries, ask Australia. They do not allow a building to go up without some water catchment devices and they are fine now.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause.
