Subject: CA "Water Fix"

I am writing you as a concerned California resident about the proposed "CA Water Fix" or Delta Tunnel plan. Every scientific analysis I have read so far says this diversion would be detrimental to the Delta Ecosystem. We can not continue to rob Peter to pay Paul, this is not a sustainable solution to Southern California water needs.

Please deny the permits that will get this project off the ground, your grandchildren will thank you!

Corrine Jones- Nevada County resident
