Dear Dave Weedman and Robert Holmes, Instream Flow Council . . .

Thanks for this information on work of the Instream Flow Council.

The San Joaquin COUNTY report in Fall, 2016, showed increasing CRITICAL WATER OVERDRAFT (since 1983).

Pest control advisors say that it can take 100 years for a drop of water to reach the Aquifer.

Then there are project proposals to move water around, with extra costs, counterproductive to growers and farmers. San Joaquin COUNTY is 2/3 of the Delta River area, and we need Sierra waters. The NATURAL GROUND WATER CYCLE is displayed in USDA/NRSC poster, 2012.

Since there is not the water to grab, we are facing a tax grab, with increasing fees, like with Alphabet soup agencies.

Where is common sense, if people care that 50% of fresh food crops for USA, come mostly from NorCAL and Delta River area?

Some say there is plenty of water, maybe compared to Bakersfield Basin. Please foster regional responsibility, like with Salt energy in Desalination (Stanford). Desalination was invented at UCB around 1970, and it has been developed in Israel, Australia and 100 nations. LA Metro knows that concrete (tunnels, pipes and canals) costs more than Desalination. Please allow our concerns in San Joaquin County to be clarified without adding costs to growers, farmers and others in the community. Please restore rivers with tributaries for Aquifer with Fisherman reports and with restorethedelta.org

Sincerely,

Jacklyn

Lauchland Shaw vineyard

Lodi, CA 95242

California Water Quality Monitoring Council

INSTREAM FLOW COUNCIL
FLOW 2018
SCIENCE • LAW • POLICY • PUBLIC DIALOGUE

The goal of this workshop (April 24-26 in Fort Collins CO) is to convey a broad understanding of tested and tried tools and strategies for sustaining and protecting ecological values of flow and standing water ecosystems when faced with drought conditions. Participants will acquire a detailed understanding of the technical, legal, and policy tools and strategies needed to effectively address a wide range of stream flow and water volume-altering activities. In addition, four pre-conference workshops held on April 24th at the workshop venue provide participants valuable skills for integrating legal, policy, institutional, public involvement and technological elements of water management.

Also - this is the last week for normal registration rates, and the block of rooms reserved for [Flow 2018](#) at the special rate of \$109/night is nearly gone! You'll need to act soon to reserve your spot at this rate. The list of presenters includes some of the most experienced authorities with firsthand knowledge of tools and strategies that can be applied wherever you work. [Read more about them on our Speaker Profile page.](#) We look forward to seeing you in Fort Collins! Make your [hotel reservations](#) at the special workshop rate of \$109 per night before they're gone. And remember, you can reserve your room at this rate for up to 3 days before or after the workshop so you can stay and enjoy everything the Colorado Front Range has to offer!

Managing Rivers, Reservoirs, and Lakes in the Face of Drought

Fort Collins, Colorado April 24-26, 2018

Registration: The early registration rate of \$450 ends April 3. After that it goes up to \$500, so act NOW!

Program:

Day 1: The first day will be a daylong training session where you can select 2 of the 4 available training sessions (1 in the morning and 1 in the afternoon) on: FERC hydropower licensing, water law concepts for dealing with drought, reducing uncertainty in riverine ecosystems during environmental change, or handling information in water management issues.

Days 2 and 3 of the workshop involve presentations by internationally recognized experts providing examples on the use and need of effective laws, policies, science, and public participation to meet water management objectives for rivers, reservoirs, and lakes under drought conditions.

The invited speakers were chosen after an extensive search by the program committee and workshop advisors. The four sessions on days 2 and 3 cover Legal, Institutional, Technical, and Public Involvement issues and culminate with facilitated discussions with the presenters.

Sponsorship/Exhibitors: The Instream Flow Council continues to offer [Sponsorship and Exhibitor opportunities for Flow 2018](#). Learn more about benefits and opportunities to showcase yourself and your services to the expected 350 participants involved in water allocation decision-making.

Hotel:

Flow 2018 is being held at the beautiful and newly renovated Hilton Fort Collins Hotel. A block of rooms has been reserved for April 22, 2018 - April 27, 2018. The special \$109 room rate will be available until March 30th or until the group block is sold-out. This rate is nearly sold out, therefore, don't delay and [book your rooms NOW!](#)

Please share this exciting news with your colleagues and others, and we look forward to seeing you in Fort Collins this April!

Eric Nagid, Instream Flow Council President
