Hi Moni, Attached is a statement and image.

Jim Hirschinger

As a fine art photographer I have captured hundreds of images of the beautiful Sacramento Delta over the years. The water is the central critical factor in providing a rich environment for wildlife as well as agricultural and recreational survival.

I believe that the tunnel project will present a very destructive force which will forever change the unique beauty and environmental value of the region.

I just want to say great thanks to those of you who have sent your letters !!!!! And then I was thinking that you could email me with comments on the proposed tunnels—with an attachment of your art work.

I am going to include the pictures of our Sac State show this spring—people are still talking about it—Many thanks for all of you that helped the imagery of this precious waterway that we take care of! Much love, Moni and Greg
