To: California State Water Resources Control Board

As a resident of Clarksburg, I am compelled to voice my opposition to the Delta Tunnels Project. Having lived in this beautiful and unique natural estuary of California, I have come to love and appreciate my surroundings. And I do not agree with the political planners who would alter the ecology so that precious water can be sent to other areas.

The Delta needs to keep her natural resource (water) for the benefit of Delta residents, businesses, fish, wildlife, visitors, recreation and ecosystems. The Delta Tunnels Project would have a devastating effect that would be felt for generations to come. It would change the entire ecosystem and result in an array of negative impacts that would require mitigation measures that have not even been considered.

Please do not pursue this Project.
