

Hey California!

Got Delta!

Not anymore! Not the valuable resource it is today, if the tunnels go through!

California has always been a leader in protecting its precious and varied environments. From the colorful coastal waters, to the Sierra mountains, to the beautiful deserts, California has protected these native resources and their ecosystems. Children throughout the state are being taught right now about how important it is to protect California's natural resources.

The tunnels will also have terrible adverse impacts on the farmers and laborers who live and work in the Delta. Please don't destroy the beautiful and fragile Delta! Please don't let the tunnels create hardships on the families who depend on working in the fields, or destroy these valuable natural resource and create hardships on the farmers!

I am an artist who paints the Delta landscapes. Please don't allow this beautiful and fragile resource to disappear. Protect one of California's most beautiful natural resources.

Please don't destroy California's precious Delta!

PLEASE VOTE TO PROTECT THE DELTA! VOTE NO TO THE TUNNELS.

Thank you,
