

Re: Policy statement

Dear Water Resources Board,

I am writing this letter in hopes of the board understanding how the quality of life will change in this beautiful Delta area. From its generations of family farms and families that grew up in this small community, to their children now raising their families here. It would be devastating to take away such a community on the Delta, and as history shows, that is what will happen. There is so much amazing history here from its farming days, to wineries, art exhibits, art shops, and food stops along the way, this area is a wonderful place for Sacramentans, as well as people from all over, to come to and enjoy.

As a business owner of the Dinky Diner located at the Clarksburg Marina, this is what I hear day in and day out from people who love to come here. They take their short drive along the beautiful river road to get here. Everyday people come to this area and they are in awe of the habitat, the birds, the greenery, the trees, and especially the Sacramento River. The river has a powerful calmness and sanctuary for city dwellers as well as for the locals. Taking this away, will totally change what is good in this world, and what helps the heart and soul of all that is good.

Please don't squelch this new and growing tourist area, this incredible gift from above.

Linda and Dennis Updegraff (and family of 3 children)
(4th Generation family)
