LSJRSD.0109

Wilseyville, CA 95257

I enthusiastically approve the recent decision to increase river flows in the Tuolumne, Merced and Stanislas. This action will benefit not only fisheries, but will radiate through the central CA environment, improving conditions for land animals, birds and plant life.

As agriculture and industry adjust, become more efficient and more suitably adapted to conditions I hope the Board will increase unimpaired river flows further and for a period longer than February-June. Karen S. Orso
