Subject: I am against the Bay-Delta plan

I am against the Bay-Delta plan.

This plan will devastate our economy and severely impact the citizens of this state. We have already been held under drought conditions in the area where I live for years as far as water use. My family and I have already cut back to minimal use. I am very conscious of our water use, and I try to be respectful towards this world that we live in.

The upcoming restrictions will be problematic, for cleanliness purposes, cooking, and basic water needs. I am nearly at a point of moving out of this state. I am not looking forward to living in third world conditions here in the valley, which held so much promise for a better life not so long ago.

Our hardworking farmers, established businesses and families deserve better than this.

I believe that this plan is a huge mistake, and it needs to be suspended completely. Our area of the state needs a plan that continues to provide the water that is needed in order to live and work here, rather than taking it away. Our hardworking farmers provide food for so many, and in the not-too distant future I envision a desert wasteland where their crops now grow.

The desires of a few to control the water supply should not outweigh the needs of those who are already working and living here in an established manner.

Thank you for your time.
