**Subject:** comment letter, revisions to proposed bay-delta plan amendments

the alternative three amendment will restore enough flow in the san joaquin river to rewater the river and keep its environment from turning into a desert----in addition to the river's surface flow----the river bed will act as a storage area for very large quantities of water-----thus beginning the rewatering of the central valley and reversing the toxic desertification of the southern section of california's great central valley---zach stewart
