Subject: Pelagic Organism Decline Workshop

I would like to make an oral presentation at the POD workshop on March 22 and March 23, 2007.

I am submitting this electronic version of my written material, which is a report titled "A Possible Approach for Integrating Delta Aquatic Species Survey Data".

I will deliver the 15 paper copies of this report (color) on Monday March 5.

Jones & Stokes is not involved in the official POD evaluation team, which is made up of very capable agency staff.

But we feel that our general observations about the POD evaluation and the IEP fish surveys will be of interest to the Board and staff.

Thank you for this opportunity to contribute to effective Bay-Delta science and regulation.
