The MND determined that the above-proposed project will have a less than significant effect on the environment and will not result in significant cumulative impacts based on the reasons specified in the Initial Study (IS). The potential adverse impacts of the project were found to be less than significant and mitigated for with the inclusion of specific license terms and revision of the existing flow bypass requirement term.

9. A Mitigation Monitoring and Reporting Plan (MMRP) has been prepared in conformance with CEQA (Public Resources Code § 21081.6). The MMRP has been developed based on the information and mitigation measures contained in the IS/MND. Pursuant to Public Resources Code section 21081.6(b), each of the applicable mitigation measures identified in the MMRP will be substantially included as enforceable terms in any amended license authorizing construction, diversion, or use of water pursuant to License 12902.

11. The State Water Board currently places standard terms in all new permits and licenses and, when acting on a Petition for Change, adds these standard terms to existing permits and licenses.

12. The State Water Board has determined that the amended license does not constitute an initiation of a new right and does not injure prior water rights or the public trust resources of the State.

13. The State Water Board has delegated the authority to act on petitions for change to the Deputy Director pursuant to Resolution No. 2007-0057. (Resolution No. 2007-0057, section 4.2.9) Resolution No. 2007-0057 authorizes the Deputy Director to redelegate this authority to the Assistant Deputy Director for Water Rights.
