2015 American R. To Sacramento R. Supply/Demand Analysis

Daily Full Natural Flow (FNF) from CDEC Station FOL, current through 10/11/2015, retrieved from CDEC website on 10/15/2015. 2014 Actual Monthly FNF Points from DWR's CDEC Website for Station FOL.

Adjusted Senior Demand (solid green line) is the change in demand from the 2014 demand to the 2015 demand through September as reported by diverters subject to the 2015 Information Order. If the line is below the top of the shaded area, a decrease in demand by the Information Order diverters is indicated.

Projected Senior Demand (dashed green line) represents forecasted demand based on the percentage change in demand by the diverters under the Information Order from 2014 to 2015. For the American River Watershed, the changes are 90%, 77%, and 91% for July, August, and September, respectively. A change of 90% was used for the October and November projected senior demands.
