

Jessica,

Please allow small water utilities (<3000acft or connections) the OPTION of using the reporting portal INSTEAD of submitting a report. This would allow small utilities to have a calculated R-gpcd and an appropriate goal instead of an arbitrary 25% reduction goal.

Redwood Valley Water District (~5000 connections, ~300acft) has seen a 60% reduction since 2009 and a 16% reduction since 2013. They are at 45 R-gpcd and reducing another 9% to meet the small retailer goal of 25% is not reasonable.

Feel free to contact me if you need addition details or clarification.

Carrie
