**Subject:** Public comment 10-35% water restriction

To the Board

I couldn't find a specific link for public comment and see in the press that comments close 4/13 so I hope this can get through.

My name is James Reichle. I am Special Counsel for the Indian Valley Community Services District (IVCSD) which provides water to less than 1,000 end users. IVCSD has an antiquated delivery system with very old cast iron pipes. Through aggressive action over the last few years, we have significantly conserved water by locating and stopping major leaks. We recently had three Board members recalled after it was discovered that the General Manager had embezzled over \$1,000,000.

We believe that it is appropriate to recognize measurable conservation in system delivery to the end user as well as the metered use by the end user and request that such conservation be recognized at least as a credit against required end user restrictions. We are doing our part and the community can't endure recall/

Thank you for your consideration.

James Reichle
