Subject: YLWD Second Comment Letter on the Mandatory Conservation  
Proposed Regulatory Framework

Dear Chairperson Marcus,

Yorba Linda Water District continues to request consideration of the points detailed in our April 13 letter. Every water provider has different requirements and challenges in operating a public water system while protecting public health and public safety, and without accommodation of the factors we have delineated we feel these are at risk.

We especially request consideration of providing credit for **Indirect Potable Reuse** and for required irrigation of **Fuel Modification Zones** within our service area. In the interest of brevity, suffice it to say we fully support both of these adjustments as detailed in the letter emailed today by MWDOC.

Thank you for your consideration.

Marc Marcantonio  
General Manager
